

UNC Mods 498/502 Teesside CO2 Entry limit Update from National Grid NTS

9th March 2015

Contents

- Action 0102 – advanced warning of gas quality variation
- Material for workgroup report
 - Historic CO2 data at terminals
 - Update on CEN gas quality standard
- Ofgem note on discrimination - UNC Mod 251

Action 0102 – advanced warning of gas quality variation

- NG NTS alarms set w.r.t. NEA limit (Teesside 2.9% CO₂)
- Terminal operator may request relaxation up to 4% CO₂ on a reasonable endeavours basis (phone call)
- Requests are very rare – none found in a sample 3 month period

Workgroup report contributions

- CO2 levels in NTS Feeder Mains
 - daily averages for ~ 12 months
- CEN gas quality standard
 - current wording for CO2 limit
 - EC stance and status

CO2 in NTS

Ofgem note UNC Mod 251 – GT target CV conditions
