

EU Tariffs Code Update

NTSCMF
15th September 2014

EU Tariff Code Update

- Consultation on draft Tariff Code closed 31st July
- 46 respondents (8 from UK)
- Comments collated into 489 page document
- Grouped into 379 consolidated comments
- Grouped into 230 issues for discussion within ENTSOG concerning changes to draft text.

Initial issues under discussion

- Tariff year harmonisation
- One-off capacity reset
- Fixed vs floating tariffs
- Transmission Services definition
- Dedicated services definition (5% cap?, exhaustive list unlikely)
- Transparency (tariff derivation, including for dedicated services)
- Separate application of methodologies in a multiple TSO e/e system
- Publication timetable (tariffs, multipliers & seasonal factors)
- Cost Allocation Methodologies – more detailed description, approach criteria, test clarity
- Reconciliation of “non-transmission” services – separate account?
- Mitigation measures – greater clarity and protection for existing capacity contracts.
