

Notice of Gas Transmission Transportation Charges

Effective from 1 October 2015

Introduction

NTS Charges to Apply From 1 October 2015

This notice is issued in line with National Grid Gas' ("National Grid") Transporters Licence in respect of the NTS and our obligations contained in the Uniform Network Code, which requires National Grid to provide at least two months' notice of changes to its gas transportation charges. This notice details changes that will apply from 1 October 2015 and follows the 'indicative notice' published on 1 May 2015. For the avoidance of doubt all charges **not** mentioned in this notice are unchanged from those in the 1 April 2015 Transportation Charging Statement¹, although we have included the NTS Exit Capacity charges for reference in Appendix 4 which were published on 1 May 2015 and have not changed since then.

This notice is split into four parts:

- **TO Charges**
 - TO Entry and Exit Commodity
 - TO Entry Capacity Reserve prices 2016/17
- **SO Charges**
 - SO Entry and Exit Commodity
 - St Fergus Compression
- **Tools and Supporting Information**
- **Appendices**

Basis of preparing the charges

National Grid sets its charges to recover the price controlled allowances set by Ofgem. The current price control RIIO-T1 applies from 1 April 2013 to 31 March 2021.

Charging Base

Updated demand forecasts were received at the end of May 2015 and the charge calculations continue to be based on the Gone Green scenario. Compared to the April 2015 charges, which were based on last year's demand forecasts, LDZ demand is forecast to be lower; Power Generation has moved up the merit order compared to coal which has meant more demand in Power Generation; flows to Ireland have increased to adjust for a slower ramping up of the use of the new Corrib field off Ireland and forecasts of exports to Europe have increased following stakeholder feedback. The net change is an increase by 4 % in demand. Taking into account the flows for the first three months of

¹<http://www.gasgovernance.co.uk/sites/default/files/Transportation%20Charging%20Statement%20April%202015new.pdf>

Introduction

the year, we are setting the charges using a demand that is about 3% higher than that used in setting April 2015 charges. However, much of this increase in demand is assumed to be using the NTS Optional Commodity charge.

The reasons for the revised changes to all the charges being updated are outlined in the following sections.

TO Charges

TO Allowed Revenues

National Grid has completed its assessment of the allowed revenue for 2014/15 and due, to an under recovery on the Entry side, there will be no TO Entry Commodity rebate with respect to 2014/15. This TO Entry under-recovery with respect to 2014/15 will feed through into 2016/17 allowed revenues.

The TO allowed revenue remains unchanged at £749m compared to the April 2015 charge setting value.

NTS TO Commodity Charges

NTS TO Entry Commodity Charge

The NTS TO Entry Commodity charge levied on Entry flows will increase to **0.0481** p/kWh (7%) from its current rate of 0.0451 p/kWh, and an average rate of 0.0470 p/kWh. This compares to the average rate of 0.0382 p/kWh in 2014/15.

The charge has increased due to;

- Lower than expected flows in the first half of this year.
- There is an increase in the forecast TO Entry Commodity revenue to be collected during this period of around £5m, increasing the TO Entry Commodity charge by around 3%. This is primarily due to less revenue collected through the monthly Entry Capacity auctions.

The final rate is in line with the October 2015 indicative value.

NTS TO Exit Commodity Charge

The TO Exit Commodity charge, which was introduced in October 2012, is a residual charge to enable National Grid to collect the correct TO Exit income from Exit shippers when NTS Exit Capacity has not been booked up to the aggregate baseline levels.

Taking into account the Exit Capacity charges and Capacity bookings for the remainder of the year, the TO Exit Commodity rate is **0.0209** p/kWh, an increase of 6% on the current rate of 0.0198 p/kWh.

Reductions in Exit Capacity bookings, following the Exit Capacity Application Window in July, has led to a forecast of £3m less capacity revenue to be collected in the 6 months from October 2015, hence the increase in the Exit Commodity rate.

A summary of NTS TO Commodity charges can be found in Appendix 5.

TO Charges

NTS TO Capacity Charges

TO Entry Capacity Reserve Prices

Revised reserve prices for Capacity bids placed in the 2016 AMSEC auction for 2016/17 have been calculated using National Grid's Transportation Model², which has been updated to reflect changes in demand levels, the pipeline network, supply patterns, obligated Entry Capacity levels, and the cost of investment through the expansion constant, all of which may affect the charges. All prices have been calculated using the NTS obligated Entry Capacity levels.

The forecast peak demand level in 2016/17 is much the same as that in 2015/16, from 5481 GWh/d to 5478 GWh/d. However there have been some changes to the Entry Capacity reserve prices due to the locational changes to supply and demand.

The revised Entry Capacity reserve prices (an updated version of Table 3 from the NTS Gas Transportation Charges Statement) can be found in Appendix 2 of this notice.

Rolling Monthly Auction prices for Interconnection Points have recently been published³ and can be seen in Appendix 3 of this notice.

NTS Exit Capacity Charges

NTS Exit Capacity charges, effective from 1 October 2015, and NTS Exit Capacity charges for Interconnection Points from 1 November 2015, have been published⁴ in a separate notice on 1 May 2015 and are also available for reference in Appendix 4 .

² See Supporting Information section for information on how to obtain a copy of our model.

⁴ <http://www.gasgovernance.co.uk/sites/default/files/Exit%20capacity%20notice%201%20may%202015.pdf>

SO Charges

SO Allowed Revenues

SO allowed revenue for 2015/16 is forecast to decrease by £16m to £272m, compared to when charges were set for April 2015. This decrease principally reflects a fall in shrinkage costs due to a revised view of unaccounted for gas and gas prices; and is in line with our view at the indicative stage.

The overall income to be collected from the SO Commodity Charge has also reduced by c. £2m compared to indicative charge setting.

NTS SO Commodity Charges

The NTS SO Commodity charge, as applied to both Entry and Exit flows, is **0.0148** p/kWh (-12%) compared to the current rate of 0.0169 p/kWh. This means that the average NTS SO Commodity rate for 2015/16 is 0.0155 p/kWh compared to an average rate for 2014/15 of 0.0195 p/kWh.

The changes to the rate are due to;

- A forecast reduction in shrinkage costs by £16m impacting on the SO Allowed Revenue. Shrinkage costs are anticipated to be lower than forecast earlier this year due to lower Unaccounted for Gas (UAG) volumes and lower than expected gas prices.
- Revenue from other sources has increased by around £2m due an increase in the use of Optional Commodity (shorthaul) charges. This reduces the revenue to be collected via the SO Commodity charge.

Other SO Charges

The **Compression Charge** levied at the Total Oil Marine sub-terminal at St. Fergus is to decrease from its current level of 0.0175 p/kWh to **0.0152** p/kWh, a 13% reduction. Our forecast of the costs for the compression at the sub-terminal remain about the same, but forecast increase in flows at the Total Oil Marine sub-terminal have led to the rate reduction.

A summary of the SO charges can be found in Appendix 5.

Supporting Information

Supporting Information

Guidance and detailed supporting charge setting information will be made available on the National Grid website at <http://www.nationalgrid.com/uk/Gas/Charges/Tools/>. This includes:

- detailed information about the components of the TO and SO allowed revenues;
- how they have changed since April's charges were set; and
- how this information in conjunction with the charging base is used to calculate charges.

National Grid will be making the Transportation Model available to parties that have signed the licence agreement for the model. Details of how to obtain the model can also be found at the link above.

There will be an opportunity to discuss these changes at a subsequent NTS Charging Methodology Forum (NTSCMF), details of which can be found at <http://www.gasgovernance.co.uk/ntscmf/>.

Getting in touch

If you have any questions or feedback about this document, or NTS charges in general, please contact Karin Elmhirst (01926 655540) or Colin Williams (01926 655916).

Comments & Feedback

As part of our commitment to customers, National Grid welcomes comments and feedback on the information contained in this notice. In particular, to ensure that information is provided and presented in a way that is of most use to customers, we would welcome specific feedback on:

- The level of numeric detail provided to explain charge changes;
- The quality of the explanation given to describe and explain charge changes;
- Information that is not useful and could be omitted;
- Information that is missing that could be added.

These should be sent to:

Karin Elmhirst
National Grid
Warwick Technology Park
Warwick
CV34 6DA

or email to Karin.elmhirst@nationalgrid.com
