

Offtake Communications Document (28th April 2009)

Following work carried out under at SOMSA SC2004 Solutions Business Review Workshops it has been identified that there are references within the OCD to Sections/paragraphs of the OAD that no longer list. The Joint Office has carried out a review of the OCD and below are the various incorrect references and some suggested actions.

This does not include the changes that relate to Action 1009OC (as per the minutes from the April 2009 Offtake Committee meeting).

Appendix 1 – Information Requirements Summary

1) OAD Section E Annex E 3.4 (Page 11, OAD Clause 3rd Row)

OAD Section E Annex E3.4 does not exist. The table entry relates to the notification by the DNO to NG NTS of battery failure. Section E does not mention this as far as I am aware.

2) OAD Section F 4.2.1(c) (Page 12, OAD Clause 3rd Row)

OAD Section F 4.2.1(c) does not exist. The clause referred to is contained within clause 4.2.1(b).

3) OAD Section I 5 (various) including I5.1.3(a), I5.1.3(b), I5.1.3(c), I5.1.3(d), I5.1.4, I5.2.1, I5.2.2, I5.2.3, I5.2.4, and I5.3.3(b)

OAD Section I 5 no longer exists (it now states “Not Used”). This was removed as part of Modification Proposal 0090. All of Section I 5 now appears in Part IIC Transitional Rules Paragraph 11. This will fall away in October 2011 so, once corrected, a further OCD change will be required.
