

2016/17 Allocation of Unidentified Gas Volumes (Mod 0229)

UNCC 17 March 2016

Fiona Cottam

- The following slides relate to the current Allocation of Unidentified Gas (AUG) processes – as introduced by Modification 0229
 - Current processes result in a Table of UG Volumes to be re-distributed from SSP to LSP sector
 - Current process remains in place until last day before Project Nexus implementation date
-
- *Separate update to be provided on Mod 0473 (new AUGE) procurement*

respect > commitment > teamwork

- December 2014 UNCC agreed not to undertake an AUG process during 2015 – i.e. no 2016/17 Table was developed
 - UNCC acknowledged that either 2015/16 or 2016/17 AUG Year could be curtailed due to Project Nexus implementation
- Prevailing Table covers April 2015 to March 2016
- Current AUG Guidelines (UNC Related Document) allow for non-production of an AUG Table:
 - Para 9.5: *If, for whatever reason, the AUGE does not produce volumes, The Committee will meet ... to either decide by unanimous vote to apply volumes that The Committee decides as appropriate or to roll over any previous Unidentified Gas volumes from a previous year.*

Matters for today's meeting

- Guidelines give UNCC the opportunity to ...
 - Unanimously agree to adopt volumes that it decides are appropriate
 - Otherwise the default position is that the previous volumes roll over
- Any proposals for alternative volumes?
- Otherwise 2015/16 Volumes will be rolled over to 2016/17
