9 September 2009

Dear John,

RE: Modification proposal 0265: Creation of a NTS Entry Capacity Retention Charge within the Uniform Network Code

Thank you for the opportunity to respond to this consultation.

Within the confines of assessment against UNC relevant objectives, and when viewed as nothing more than a facilitating proposal, British Gas Trading finds it difficult to object to the implementation of this modification proposal. We would, however, take this further opportunity to once again highlight that we do not support the substitution regime that this modification proposal is designed to facilitate.

Please contact me if you would like to discuss this response.

Yours sincerely,

Chris Wright
Commercial Manager
