Modification Proposal 266: Amendment to Gas Quality NTS Entry Specifications for the North Morecambe Terminal

Dear John,

RWE npower supports the above modification proposal.

We agree it is appropriate to bring the gas entry specifications for North Morecambe (which have their origins in a contractual agreement that was in existence prior to the advent of Network Code) into line with the GSMR lower and upper Wobbe limits. This has the potential to increase the volume of UKCS gas that could be brought to market, thus enhancing the security of domestic customer supply and potentially enhancing competition.

Yours sincerely,

Steve Rose*
