

## **Post Meeting Update Provided by National Grid NTS**

National Grid Transmission agreed to provide a link to the System Operator Incentives webpage. This link is:

<http://www.nationalgrid.com/uk/Gas/soincentives/>

As the meeting was particularly interested in National Grid Transmission's role in the management of UAG, National Grid NTS would like to draw people's attention to the "Supporting Information" section, which is accessed via the link to the left hand side of the main page. Within this link there is a document titled - UAG Industry Update and one titled - Supporting Information. These documents describe our UAG incentive structure, our performance to date under the incentive and the estimated value of some of the main UAG related meter errors that have been identified as a result of our efforts.

We are currently in the process of developing and agreeing the SO incentives for both the 2012/13 "roll over" year and for the RIIO incentive period of 2013 to 2021 and would welcome views from all stakeholders.

The contact details of the members of the SO incentives team are also displayed on the website.
