17th May 2010

Quarterly System Entry Capacity (QSEC) March 2010 **Allocations**

Dear Colleague,

The allocation of capacity further to the March 2010 QSEC auction has now taken place following the application of the tests described in National Grid plc's Incremental Entry Capacity Release (IECR) statement and in accordance with the Entry Capacity Substitution Methodology Statement.

Please accept this as notice that the capacity allocation within Gemini has now been completed. Users can view their allocated bids via the Gemini screen **Home>Deal>Bid Capture Reports>Bid Information**.

The following information will also be published by National Grid plc within Gemini and can be found via **Home>Product>Publish Reports>MoS Results**.

National Grid will also publish this aggregate information on the web site <http://marketinformation.natgrid.co.uk/Gas/CapacityReports.aspx> not later than close of business Tuesday 18th May 2010.

For each Aggregated System Entry Point (ASEP) and each relevant period;

- Volume of Baseline, Obligated Incremental and Non-Obligated Incremental capacity allocated
- Revenue from sales of Baseline, Obligated Incremental and Non-Obligated Incremental capacity
- Amount of unallocated Baseline Capacity
- Clearing Price (this will be the same as the highest, lowest and weighted average prices)
- The number of Users who submitted successful capacity bids
- The number of Users who submitted unsuccessful capacity bids
- Where there is an allocation of QSEC in a period - number of Users who submitted bids at each price level

If you have any queries with regards to entry capacity, the auction mechanism, Gemini or information provision then please do not hesitate to contact Diana Dai or myself on +44 (0)1926 65 4057. Alternatively you can e-mail the capacity team regarding any long term capacity issues at capacityauctions@uk.ngrid.com.

Yours sincerely
