

## **Review Group 0131 June Monthly Report to Panel**

### **Meetings Held**

30 May 2007, Holiday Inn, Solihull.

### **Planned**

13 July 2007, Solihull.

### **Matters for Panel's Attention**

The Review Group has agreed that a draft final report should be produced for consideration at a meeting on 13 July. It was also agreed that some practical issues should be taken forward as an Offtake Arrangements Workstream topic.

### **Topics Discussed**

The key issue discussed by the group was the timing and extent of Shipper involvement when a meter error is discovered. It was accepted that somewhat earlier involvement than under the 0643 process is appropriate, but that the focus of this would be on transparency and information rather than a direct input into any report. It was agreed that a report should be drafted on this basis, including a draft Modification Proposal.
