

## **Review Group 0140 July Monthly Report to Panel**

### **Meeting Held**

19 June 2007

9 July 2007

### **Planned**

27 July 2007, Elexon.

### **Matters for Panel's Attention**

The Review Group has agreed revised Terms of Reference

### **Topics Discussed**

Work has continued on reviewing data items for inclusion in future website reports. Substantial agreement has been reached on items relating to Demand, Supply, Prices, Interruption, Balancing, Shrinkage and Storage. This leaves Capacity, Linepack, Maintenance and "Other/Miscellaneous" to be reviewed.

Agreement has also been reached on the principles of reporting, which are aimed at displaying the data at the earliest practical stage and at reducing the current incidences of duplicate data eg identical items on daily and monthly reports.

Chris Wright of Centrica gave a presentation on additional data items which might be incorporated in the future. This includes pressure data at entry, exit and at compression stations. Members of the Review Group are considering the value of including these items and any associated issues.
