Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Modification 0488S seeks to provide greater transparency of the AQ Review process by reporting the effect of AQ amendments on the Provisional AQ. The new report will also separate reporting for large and small supply points. This will provide greater transparency and clarity of a shipper's activity, which we believe will benefit the industry and improve the understanding of the AQ Review process.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

No

Do you agree with the Modification Panel's decision that this should be a self-governance modification?

We believe this proposal will have a positive impact on Relevant Objectives (f). UNC Code in fairly light on the detailed production of the AQ review report, therefore this change will better facilitate the existing and the new process arrangements.
