Modification Proposal

0423S - Removing the UNC TPD Section O requirement to publish nodal forecast data only at the same time as the Ten Year Statement

Consultation close out date: 10 July 2012
Respond to: enquiries@gasgovernance.co.uk
Organisation: British Gas Trading Limited
Representative: Chris Wright
Date of Representation: 10 July 2012

Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Publishing nodal forecast data other than at the same time as the Ten Year Statement will allow shippers to undertake more informed modelling activities. That will provide a better understanding of capacity dynamics, which in turn will lead to more efficient decision making with regard to capacity purchases and utilisation.

We also agree that it does not appear to have been the intention of the proposer of 0134V – which updated the rules for the publication of data – to restrict publication only to coincide with the Ten Year Statement.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

No.

Relevant Objectives:

How would implementation of this modification impact the relevant objectives?

We agree with the proposer's views on how this proposal better facilitates the relevant objectives.

Impacts and Costs:

What analysis, development and ongoing costs would you face if this modification were implemented?

None.

Implementation:

What lead-time would you wish to see prior to this modification being implemented, and why?

Immediate upon direction.

Legal Text:

Are you satisfied that the legal text will deliver the intent of the modification?

Yes.

Is there anything further you wish to be taken into account?

Please provide any additional comments, supporting analysis, or other information that that you believe should be taken into account or you wish to emphasise.

No.
