Date of Representation:	08/06/2016
Support or oppose implementation?	Qualified Support
Relevant Objective:	Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

ESP is happy to support this modification with the caveat that it is made clear that iGTs are working on a modification that has some differences.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

ESP will not comment on the SG rule but re iterate that in iGT modification 75 the modification is not proposed to be self-governance as it will have impacts on both Gas Transporters and Shippers systems.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

As per above.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

iGTs would also like to highlight that as this modification is in both forums that iGTs are to discuss with providers(Xoserve, Gemserv) about hosting on their websites. Also that we would like to have a uniformed arena for this, as to avoid any doubt.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

N/A

Modification Panel Members have requested that the following questions are addressed:

Q1: Respondents are asked to provide views on the impacts to SPAA parties

There is a concern that this could be used adversely to help with smart meter roll out for smaller parties (and larger for that matter).

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

N/A

Please provide below any additional analysis or information to support your representation:

That iGTs will be working on their on separate modification iGT075 that will pace an emphasis on the following HP, LP, MP and IP.
