Support or oppose implementation?	Support
Relevant Objective:	f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

ESPUG believe that this modification summarises the extra business requirements clearly and that it will correct all relevant housekeeping issues and are supportive as we believe that these changes will increase the efficiency in the implementation and administration of the Code

Self-Governance Statement: Please provide your views on the self-governance statement.

ESPUG agree that this modification meets the self-governance criteria.

Implementation: What lead-time do you wish to see prior to implementation and why?

ESPUG agree with the implementation timeframe suggested in the Workgroup Report.

Impacts and Costs: What analysis, development and ongoing costs would you face?

There will be no ongoing costs faced by ESPUG, but there will be a resource cost associated with producing a catch all modification in iGT-UNC because of the inclusion of additional text, should this change be approved.

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

ESPUG has noted a number of future updates that will need to be included in a separate catch all modification to take into account new formatting in the legal text, but as this is considered to be minor housekeeping, ESPUG accepts the legal text is sufficient.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

As mentioned above, the updates required to align will be added into a Fast Track Self-Governance Modification Proposal to the iGT-UNC.

Please provide below any additional analysis or information to support your representation
