Do you support or oppose implementation?

Not in Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

MEUC can foresee difficulties arising at times of proposed transfers depending on the time of year, with this becoming a barrier to competition.

The solution on cash flow is in the hands of the small supplier as with all other suppliers', they can introduce a fixed element to their charges thereby recovering all transportation charges on a monthly basis with only the commodity varying. This in some ways may help their customers by making their bills more predictable.

Are there any new or additional issues that you believe should be recorded in the Modification Report?
