UNC Modification Proposal 0608S – Implementation of 'single service provision' arrangements for iGT connected system exit points (Project Nexus transitional modification)

Dear Bob,

Thank you for your invitation seeking representations with respect to the above Modification Proposals for which National Grid Gas Distribution (NGGD) would like to support.

Do you support or oppose implementation?

0608S - Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition:

As proposer we raised Modification 0608S, in conjunction with a number of other transitional modifications, to enable an efficient transition to the new UK Link systems; transitional terms in this instance being required to ensure an orderly close down of the CSEP NExA and transition to the iGT Arrangements Document (IGTAD). Our Lawyers have been available at the relevant workgroups to ensure full understanding of the modification and its associated Legal Text and to ensure that the modification is both robust and complete.

Relevant Objectives:

f) Promotion of efficiency in the implementation and administration of the Code.

The Modification provides for an orderly transfer of commercial arrangements prior to, during and after Project Nexus Implementation Date (PNID) and consequently we concur with the comments in the Draft Modification Report concerning the facilitation of this relevant objective.

Impacts and Costs:

We agree with the statement in the Draft Modification Report concerning the funding of this Modification Proposal and we have no further comment in this respect.

Implementation:

We are in agreement with the implementation timescales identified within this Modification Proposal.

Legal Text:

As provider of the Legal Text for 0608S we are satisfied that it fully delivers the intent of the solution.

Views on errors or omissions in the Modification Report which should be taken into account:

We have not identified any such errors or omissions.

Additional analysis or information to support your representation:

We have nothing further to add.

We trust that this information will assist in the compilation of the Final Modification Report. Please contact me on 01926 655299 (andy.clasper@nationalgrid.com) should you require any further information.

Yours sincerely,

Andy Clasper
