Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

npower support the implementation of this proposal as it will ensure a smooth transition into the new interruption regime put in place under UNC090. We anticipate no impact on our business processes and believe that the chosen methodology of the Proposer is appropriate and fulfils the intent of the modification.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

None.

Self Governance Statement:

Do you agree with the Modification Panel's decision that this should be a self-governance modification?

Yes

Relevant Objectives:

How would implementation of this modification impact the relevant objectives?

We agree with the proposer that it will ensure efficient implementation of the Uniform Network Code by putting in place an appropriate framework to allow the Transporters to reconfirm sites as Firm that a Shipper has not prior to the implementation of Interruption Reform. There may be a detrimental impact to the industry if this is not put in place.

Impacts and Costs:

What analysis, development and ongoing costs would you face if this modification were implemented?

None.

Implementation:

What lead-time would you wish to see prior to this modification being implemented, and why?

None.

Is there anything further you wish to be taken into account?

Please provide any additional comments, supporting analysis, or other information that you believe should be taken into account or you wish to emphasise.

No.
