

Representation - Draft Modification Report UNC 0609

Transitional arrangements for gas settlement and replacement of Meter Readings, (Project Nexus transitional modification)

Responses invited by: **5pm on 06 April 2017**

To: enquiries@gasgovernance.co.uk

Representative:	Fraser Mathieson
Organisation:	Scotland Gas Networks and Southern Gas Networks
Date of Representation:	06 April 2017
Support or oppose implementation?	Support
Relevant Objective:	d) Positive f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

SGN supports Modification 0609 as it enables an orderly and efficient transition from old to new arrangements and ensures PNID is accurately reflected in the transition arrangements within the UNC.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

An authority decision and implementation as soon as reasonably practicable is requested in order to provide parties with certainty in arrangements.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

Given the non-application of both ratchet charges and the associated increased capacity charges during the non-effective period, SGN will lose the income usually anticipated in the event of an excess consumption. Operational costs may also be incurred due to the consequent necessity to undertake additional monitoring of Network usage during this period.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No.

Please provide below any additional analysis or information to support your representation

N/A.
