Support or oppose implementation?	Support
Relevant Objective:	f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

SGN supports Modification 0610 as it clearly sets out the amendments and updates to requirements that have evolved as part of the development of the UK Link Replacement Programme and that now must be reflected within the UNC. We note that no adverse impacts have been identified during workgroup development.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

We agree with self-governance status as the proposed changes primarily reflect process and housekeeping driven requirements that are necessary to provide clarity within the UNC and do not materially affect commercial arrangements.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

Implementation should be as soon as reasonably practicable, in order to provide certainty.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No.

Please provide below any additional analysis or information to support your representation

N/A.
