#### Do you support or oppose implementation?

0428 - Support

0428A - Support

#### If either 0428 or 0428A were to be implemented, which would be your preference?

Prefer 0428

#### Please summarise (in one paragraph) the key reason(s) for your support/opposition.

While the occurrence of multi-metered supply points within the SSP market is relatively small, they can create considerable issues with both the change of supply process and AQ. Customer can either experience delays waiting for the de-aggregation before they move supply or they could be erroneously transferred if a different supply within the group is transferred. There is also the issue of when the aggregated AQ brings these supply points into the LSP market. We believe that to remove multi-metered supply points from the SSP market can only be beneficial.

#### Are there any new or additional issues that you believe should be recorded in the Modification Report?
