Draft Modification Report

0434: Project Nexus – Retrospective Adjustment

Consultation close out date: 06 January 2014

Respond to: enquiries@gasgovernance.co.uk

Organisation: Winchester Gas

Representative: Huw Comerford

Date of Representation: 10 December 2013

Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

The ability to automate the retrospective updating of metering information is extremely important in the face of the smart meter roll out and the potential metering issues that will arise from placing every meter in the country to a smart meter. The current manual process is time and resource consuming. This modification will also allow the retrospective updating of metering information for small supply points, and this will be essential for accurate individual reconciliation as currently retrospective is not available for small supply points.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

Relevant Objectives:
How would implementation of this modification impact the relevant objectives?

Impacts and Costs:
What analysis, development and ongoing costs would you face if this modification were implemented?

Implementation:
What lead-time would you wish to see prior to this modification being implemented, and why?

We would find the 18 month lead time given in the modification would be suitable time period to allow us to implement the changes

Legal Text:
Are you satisfied that the legal text will deliver the intent of the modification?

Is there anything further you wish to be taken into account?
Please provide any additional comments, supporting analysis, or other information that that you believe should be taken into account or you wish to emphasise.
