

Please find below Scotia Gas Networks response for Action 0101: Each DN to provide apportionment values by LDZ for the Shrinkage Proposals:

The apportionment of Southern DN shrinkage volumes in the RIIO-GD1 Final Proposals is approx 40% for SO LDZ and 60% for SE LDZ. These ratios are based on our final submissions to Ofgem from April 2012. The assumption is that Ofgem will have applied a similar apportionment when evaluating the Final Proposals.
