0487S - Introduction of Advanced Meter Indicator and Advanced Meter Reader (AMR) Service Provider Identifier

Date referred from Panel: 20 March 2014

Background – Why Change?

Please refer to www.gasgovernance.co.uk/0487

Solution

This modification has been raised to introduce an Advanced Meter Indicator and Advanced Meter Reader (AMR) Service Provider Identifier. Currently central systems do not identify whether a meter is operating in Advanced Mode nor who the Advanced Meter Reading Service Provider (ASP) is. It is proposed to introduce an indicator into central systems to be maintained and provided to relevant parties during the Change of Supplier (CoS) process.

Topics for Discussion

- Understanding the objective
- Assessment of alternative means to achieve objective
- Development of Solution (including business rules if appropriate)
- Assessment of potential impacts of the modification
- Assessment of implementation costs
- Assessment of legal text.

Outputs

Produce a Workgroup Report for submission to the Modification Panel, containing the assessment and recommendations of the Workgroup.

Composition of Workgroup

The Workgroup is open to any party that wishes to attend or participate.

A Workgroup meeting will be quorate provided at least two Transporter and two User representatives are present.

Meeting Arrangements

Meetings will be administered by the Joint Office and conducted in accordance with the Code Administration Code of Practice
