

Topic 007OF - Gas transporter cooperation on planning and investment in networks (transitional)

As a result of recent UNC Modifications and the implementation of the Transitional Regime, it is proposed that a review of the network planning interactions, between gas transporters, should be undertaken before the commencement of the 2006 planning cycle (May 2006).

The areas to be considered are:

- UNC Compliance
- Data flows
- Timescales
- Format for information exchange
- UNC Modifications

The output from the review should be presented to the UNC Offtake Arrangements Workstream on April 5.

Gas Transporters are asked to participate in with this review.
