

## UNC Related Document Modification Request

### ECQ (Emergency Curtailment Quantity) Methodology

**Date:** 14 December 2012

National Grid, requests a modification to UNC Related Document, ECQ (Emergency Curtailment Quantity) Methodology pursuant TPD Section V 12.3 of the UNC.

#### Reason for Modification

The ECQ (Emergency Curtailment Quantity) Methodology needs to be updated to reflect changes to Exit Reform and to include the appropriate Document Control Section.

#### Nature of Modification

Methodology to refer to "System Exit Points connected to Distribution Networks" and "NTS Directly Connected System Exit Points".

A changed marked methodology has been provided to highlight the necessary changes.

#### Proposer's Representative

Martin Connor, National Grid

#### Proposer

Martin Connor, National Grid
