

Update from D Rachwal, National Grid NTS

This data file can be published in Excel format – as per file published on 12th March

<http://www.gasgovernance.co.uk/0498/090315> . Since 12th March I checked about permissions from other terminals and we are OK to publish in this aggregated form.

Explanation

One or two workgroup members asked me for the numbers behind the graphs in Appendix 1 of the workgroup report

<http://www.gasgovernance.co.uk/sites/default/files/Workgroup%20Report%200498%200502%20v0.9.pdf> . I was also asked to cover Theddlethorpe terminal as well which I have done by combining it with Easington (as a means of respecting the wishes of the single entry point party at Theddlethorpe).

Best regards,

Dennis
