

Valid & Invalid Query Examples

| | Opening AQ | Shipper A | | | | Shipper B | | | | Shipper C | | | | Valid |
|---|------------|------------------|------------|------------------|------------|------------------|------------|------------------|------------|-------------------|------------|-------------------|------------|-------|
| | | Consumption (M2) | Implied AQ | Consumption (M4) | Implied AQ | Consumption (M6) | Implied AQ | Consumption (M8) | Implied AQ | Consumption (M10) | Implied AQ | Consumption (M12) | Implied AQ | |
| 1 | 12,000 | 2,000 | 12,000 | 4,000 | 12,000 | 6,000 | 12,000 | 8,000 | 12,000 | 10,000 | 12,000 | 120,000 | 120,000 | Yes |
| 2 | 12,000 | 2,000 | 12,000 | 4,000 | 12,000 | 6,000 | 12,000 | 44,000 | 120,000 | 82,000 | 120,000 | 120,000 | 120,000 | Yes |
| 3 | 12,000 | 2,000 | 12,000 | 4,000 | 12,000 | 33,000 | 120,000 | 62,000 | 120,000 | 91,000 | 120,000 | 120,000 | 120,000 | No |
| 4 | 12,000 | 2,000 | 12,000 | 25,600 | 120,000 | 49,200 | 120,000 | 72,800 | 120,000 | 96,400 | 120,000 | 120,000 | 120,000 | No |
| 5 | 73,100 | 12,183 | 73,100 | 24,367 | 73,100 | 36,550 | 73,100 | 48,733 | 73,100 | 60,917 | 73,300 | 73,300 | 73,300 | Yes |
| 6 | 24,000 | 2,000 | 24,000 | 34,000 | 120,000 | 38,000 | 52,000 | 58,000 | 108,000 | 62,000 | 68,000 | 88,000 | 88,000 | No |
| 7 | 12,000 | 2,000 | 12,000 | - | - | - | - | - | - | - | - | 120,000 | 120,000 | No |

Assumptions:

1. Each Shipper registered to Supply Point for 4 months
2. No historical information available to Shippers
3. All other details correct and accurate
4. Meter readings are available every 2 months

Potential Allocation Arrangements:

1. **100% Shipper C** – change in consumption clearly occurred in Shipper C’s ownership and should have appealed AQ to avoid Mod 640 charges
2. **50% Shipper B 50% Shipper C** – change in consumption clearly occurred in Shipper B’s ownership and both Shipper B and Shipper C should have appealed the AQ

3. **Invalid query** – change in consumption could have occurred in Shipper A’s or Shipper B’s ownership. However if significant evidence to demonstrate that AQ was SSP for significant period in Shipper’s A ownership potential to re-apportion with more waiting to Shipper B and C
4. **Invalid query** – change in consumption occurred in Shipper A’s ownership. Current charges stand
5. **50% Shipper B 50% Shipper C** – Shipper A query valid as evidence that change in AQ occurred in Shipper B’s ownership. Shipper B to Shipper C query invalid as unclear when change in AQ occurred.
6. **Invalid** – volatile consumption but all Shippers should have appealed AQ with information available.
7. **Invalid query** – unclear when change in AQ occurred due to lack of meter readings.
