

Variation Request

0363: Commercial Arrangements for NTS Commingling Facilities

Date: 12/09/2011

The Proposer, National Grid NTS, requests a variation to this Proposal, pursuant to UNC Modification Rules Section 6.5.1(c) of the UNC.

Reason for Variation

Following a review of the suggested text National Grid NTS has identified a requirement to add an additional paragraph and remove some square brackets.

Nature of Variation

Remove the square brackets around new paragraph E1.10.3

Add the following text as a new paragraph E1.10.5.

“In relation to a NTS Commingling Facility, the Connected System Agreement shall require the Connected System Operator to install volume and calorimetric measurement equipment at the Connected System Exit Point and the System Entry Point comprised in such facility by means of which the gross commingling exit quantity and the gross commingling entry quantity shall be determined.”

Proposer's Representative

Phil Hobbins, National Grid NTS
