

Stage 02: Workgroup Report

0455S:

Updating of Meter Information by the Transporter

At what stage is this document in the process?

The purpose of this Modification is to provide for the Transporter to update Meter Information on the Supply Point Register in circumstances where the Registered User has failed to do so.

The Workgroup recommends that this self-governance modification should now proceed to consultation.

High Impact:
None

Medium Impact:
None

Low Impact:
[Transporters and Users]

About this document:

This report will be presented by the Workgroup to the panel on 21 December 2013.

The Panel will consider whether the modification is sufficiently developed to proceed to Consultation and to submit any further recommendations in respect of the definition and assessment of this **self-governance** modification.

1 Summary

Is this a Self-Governance Modification?

The Modification Panel determined that this is a self-governance modification.

Why Change?

The Transporters agent presently spends significant time and resources in pursuing Users who have not updated relevant Meter Information on the Supply Point Register. The untimely updating of such data adversely impacts on the industry in a variety of respects and is inconsistent with an industry imperative of ensuring up to date and accurate data.

Solution

It is proposed that Transporters should have the ability to update Meter Information on the Supply Point Register where the Registered User has failed or been unable to perform this. This will be subject to that User having had a reasonable opportunity to do so. It is also proposed that an appropriate charge be levied on the relevant User where this occurs.

Relevant Objectives

The prompt and timely update of Meter Information is critical to the efficient operation of those provisions of the UNC concerned with NDM Allocation, Annual Quantity calculation, Individual Meter Point Reconciliation and Billing. Accuracy in this respect can be expected to facilitate GT Licence relevant objective:

- d) Securing of effective competition:
 - (i) between relevant shippers;
 - (ii) between relevant suppliers

Implementation

As this is a self-governance modification, implementation could be sixteen business days after a Modification Panel decision to implement.

2 Why Change?

The Transporters agent currently expends significant time and resources in communicating with Users who have not updated relevant Meter Information on the Supply Point Register. Accurate Meter Information leads to improved Meter Reading acceptance by the Transporter, which in turn enables improved Annual Quantity (AQ) calculations. A further consequence is timely and improved Individual Meter Point Reconciliation at Larger Supply Points. Failure to update such data promptly and accurately adversely impacts on the industry in a variety of respects.

3 Solution

TPD Section M of the UNC states the following:

3.2.15 Where at any time in respect of any Supply Meter Point the Transporter becomes aware that the Meter Information held in the Supply Point Register is incorrect (other than where the Transporter has received this information from the Registered User) within 6 Business Days of the Day upon which it becomes aware of this, the Transporter will so notify the Registered User and provide all relevant details and the Registered User will as soon as reasonably practicable review such details, and where necessary update the Meter Information and submit to the Transporter a Meter Information Notification or a Meter Information Update Notification containing such update in respect of such Supply Meter Point.

It is proposed that the UNC be amended to enable the updating of Meter Information (commonly termed meter asset data) on the Supply Point Register by the Transporter in the following circumstances:

1. Where the Transporter has provided the Registered User with a notification of incorrect or absent Meter Information, to require the Registered User to review this and update the Meter Information within [x days] of such notification or provide the Transporter with an explanation of why it would be inappropriate to do so.
2. Where the Registered User has not complied with (1) the Transporter will update the Meter Information and notify the Registered User of this action
3. Where the Transporter has undertaken the action identified in (2), this will be deemed to be an update by the Registered User who will then be liable for a User Pays charge to be detailed in the Agency Charging Statement
4. Where the UNC identifies that the previous Registered User has a residual responsibility for the Supply Point then (1) and (2) applies (to the extent that the previous Registered User is deemed to be the Registered User)
5. In circumstances where no Registered User is present or has residual responsibility in accordance with (4), the Transporter may elect at its discretion to update the Meter Information

User Pays

Classification of the modification as User Pays, or not, and the justification for such classification.

User Pays arrangements will apply. The detail of this is to be identified. **[WG to add why]**

Identification of Users of the service, the proposed split of the recovery between Gas Transporters and Users for User Pays costs and the justification for such view.

100% User **[WG to add why]**

Proposed charge(s) for application of User Pays charges to Shippers.

To be completed for User Pays Modifications

Proposed charge for inclusion in the Agency Charging Statement (ACS) – to be completed upon receipt of a cost estimate from Xoserve.

To be completed before a modification is issued to consultation

4 Relevant Objectives

Impact of the modification on the Relevant Objectives:	
Relevant Objective	Identified impact
a) Efficient and economic operation of the pipe-line system.	None
b) Coordinated, efficient and economic operation of (i) the combined pipe-line system, and/ or (ii) the pipe-line system of one or more other relevant gas transporters.	None
c) Efficient discharge of the licensee's obligations.	None
d) Securing of effective competition: (i) between relevant shippers; (ii) between relevant suppliers; and/or (iii) between DN operators (who have entered into transportation arrangements with other relevant gas transporters) and relevant shippers.	Positive
e) Provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards... are satisfied as respects the availability of gas to their domestic customers.	None
f) Promotion of efficiency in the implementation and administration of the Code.	None
g) Compliance with the Regulation and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators.	None

The updating of Meter Information on the Supply Point Register is critical to the efficient operation of those provisions of the UNC concerned with NDM Allocation, Annual Quantity calculation, Individual Meter Point Reconciliation and Transportation Billing. The objective of the changes identified within this Modification Proposal is to provide a mechanism that where the relevant Registered User has failed or been unable to provide a timely update of Meter Information to the Transporter (in circumstances where the Transporter has identified and notified such changes to the User) the Transporter will update such data on behalf of the User. The Transporter may also update data at its discretion where no Registered User is present.

Accuracy and timely updates in respect of Meter Information recorded on the Supply Point Register can be expected to facilitate GT Licence relevant objective:

- d) Securing of effective competition:
 - (i) between relevant shippers;
 - (ii) between relevant suppliers

5 Implementation

As self-governance procedures are proposed, implementation could be sixteen business days after a Modification Panel decision to implement.

6 Legal Text

The following Text has been prepared by National Grid at the request from Panel, and no issues were raised by the Workgroup regarding its content.

Transportation Principal Document

Section M (13 August 2013 version)

Amend paragraph 3.2.15 to read as follows:

3.2.15 Where at any time in respect of any Supply Meter Point the Transporter becomes aware that the Meter Information held in the Supply Point Register is incorrect ~~(other than where the Transporter has received this information from the Registered User)~~ within 6 Business Days of the Day upon which it becomes aware of this, the Transporter will so notify the Registered User or the Relevant Registered User (as the case may be) and provide all relevant details and the Registered User or the Relevant Registered User (as the case may be) will as soon as reasonably practicable review such details, and where necessary update the Meter Information and submit to the Transporter a Meter Information Notification or a Meter Information Update Notification containing such update in respect of such Supply Meter Point. In the event that:

- (a) the Registered User or the Relevant Registered User (as the case may be) fails within [X] Days following the Transporter's notification in accordance with this paragraph 3.2.15 to either update the Meter Information or inform the Transporter why the Registered User or the Relevant Registered User (as the case may be) believes that it would be inappropriate to update the Meter Information:
 - (i) the Transporter may in its sole discretion proceed to update the Meter Information and shall notify the Registered User or the Relevant Registered User (as the case may be) accordingly;
 - (ii) such update of the Meter Information pursuant to paragraph 3.2.15(a)(i) shall be deemed to be an update by the Registered User or the Relevant Registered User (as the case may be); and
 - (iii) the Registered User or the Relevant Registered User (as the case may be) shall be liable for a User Pays Charge as a result of the updated Meter Information;
- (b) there is no Registered User or Relevant Registered User (as the case may be) in respect of the Supply Meter Point, the Transporter may in its sole discretion update the Meter Information.

7 Recommendation

The Workgroup invites the Panel to:

- AGREE that this self-governance modification should be submitted for consultation.
