

## Workgroup Terms of Reference

### **Modification 0369 – Re-establishment of Supply Meter Points – measures to address shipperless sites**

**Workgroup Report to Panel Meeting:** 21 July 2011

**Date referred from Panel:** 17 March 2011

### **Background – Why Change?**

See [www.gasgovernance.co.uk/0369](http://www.gasgovernance.co.uk/0369)

### **Solution**

It is proposed that the UNC is modified to clarify that the User's registration remains in place from the date of Effective Supply Point Withdrawal where the Transporter (or another party) identifies that the same Supply Meter is installed at the premises and is capable of flowing gas. The terms proposed specify how the Supply Point Registration is re-generated in the SPR.

The presence of a registration in the SPR will ensure that a Deemed Supply Contract is in place and thus enable the User to recover its costs through its supplier arrangements. This will result in the appropriate targeting of Transportation and supply costs.

### **Topics for Discussion**

Understanding the objective

Review the definitions within the modification

Assess the materiality of the modification and its aims

Assessment of alternative means to achieve objective

Development of Solution (including business rules if appropriate)

Assessment of potential impacts of the modification

Assessment of implementation costs

Assessment of legal text

### **Outputs**

Produce a Workgroup Report for submission to the Modification Panel, containing the assessment and recommendations of the Workgroup.

## Composition of Workgroup

This Workgroup will be open to any party that wishes to attend or participate.

A Workgroup meeting will be quorate provided at least two Transporter and two User representatives are present.

## Meeting Arrangements

Meetings will be administered by the Joint Office and conducted in accordance with the Code Administration Code of Practice
