UK Link Future Releases

Release 2 Scope Selection Process

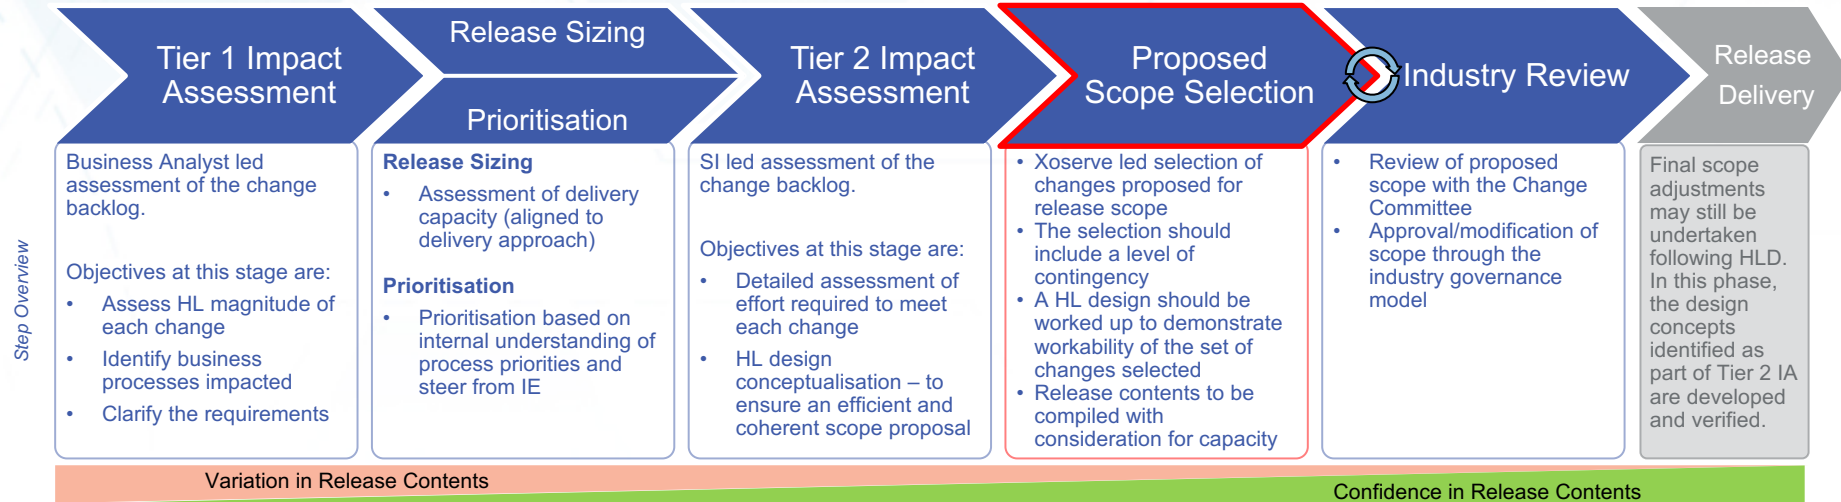

UK Link Future Releases - Lifecycle Logical View

- The diagram below provides an overview of the sequential phases of a standard UK Link Future Release Lifecycle
- This lifecycle is constructed with key points throughout it that enable greater control of scope and delivery plan which ultimately lead to the objective of **increased certainty for Market Participants and Xoserve**
- The evolution and refinement of both release scope and delivery plan is overlaid against the release lifecycle to illustrate the phases which are dependencies for locking both scope and plan

Context: Release Scoping Approach

The diagram below describes the scoping approach we are following for Release 2 and specifically calls out the objectives and key principles that have informed the scope selection process.

Principles Driving the Scoping Process:

- Release 2 will be of a larger scale and focused on changes to improve service provision (eg. removal of manual processes) that have low consequential change to Market Participants' system and interfaces
- Xoserve have remit to include service sustaining changes into release scope proposals (even if not prioritised by the DSC Change Committee)
- Delivery capacity verification needs to be carried out to ensure the proposed scope of a release can be accommodated within the planned delivery timeframe
- Non-functional and potential market trials implications need to be considered when selecting the scope of a release

Release 2 Scoping Process

Impact Assessments

Change Demand Backlog

Scoping Process

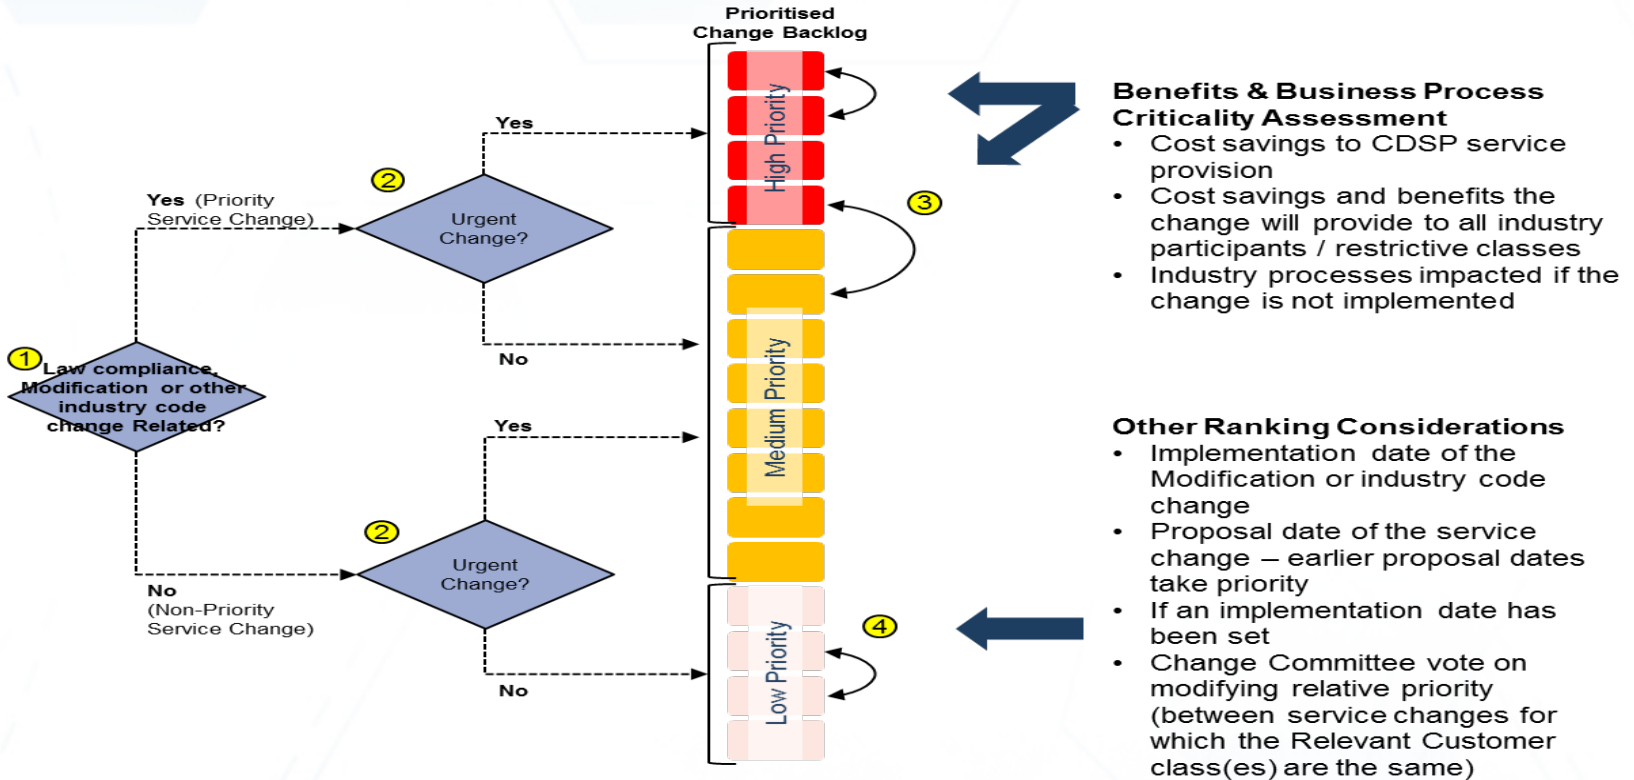

- 1 Prioritisation
- 2 Assessment
- 3 Scoping

R2 Release Scope

Prioritisation Framework

The 4 step framework used* by DSC ChMC to define the priority of a change. A High priority change is considered as the one with most benefit.

*As per the agreed '[UKLink Future Release Prioritisation & Scoping Approach](#)', Section 5, Page 3.

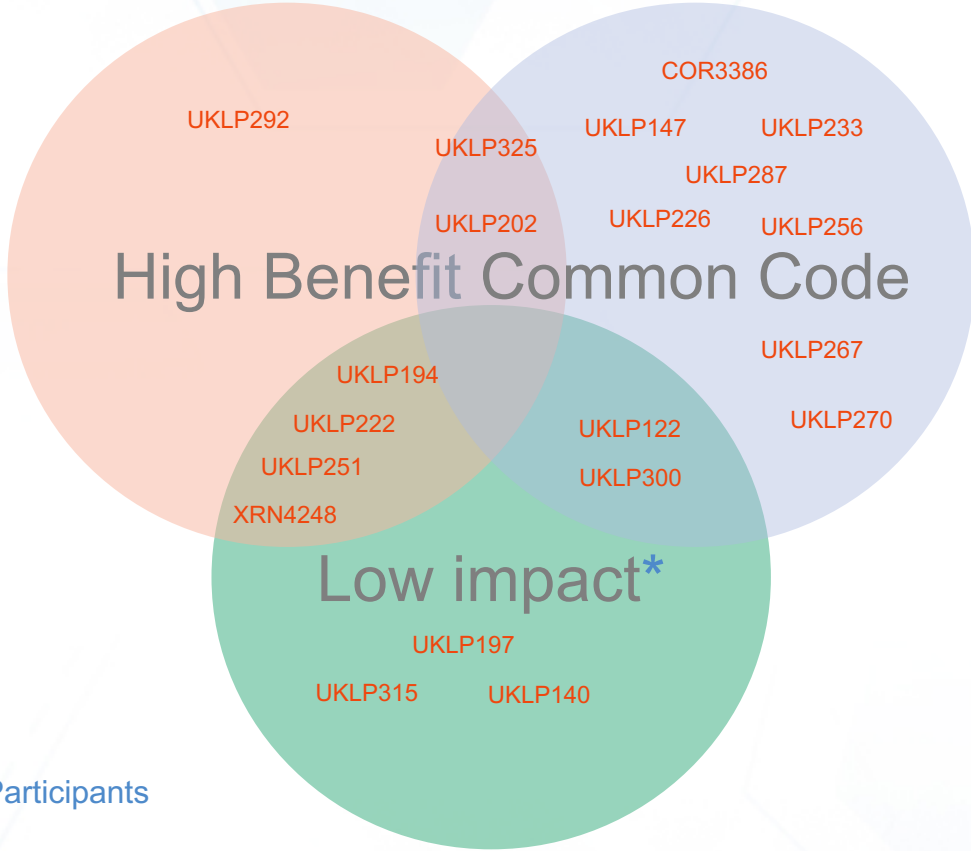

Impact Assessment Approach

The Tier 2 IA of changes have identified the impacts to systems (Internal & External) and processes. Based on this information, changes are categorised as 3 impact levels;

- **Level 1** – No external impact, purely internal change
- **Level 2** – No impacts to external interfaces, but impacts to external business processes
- **Level 3** – Impacts to external interfaces. Any change impacting an external file format is classified as level 3 by default.

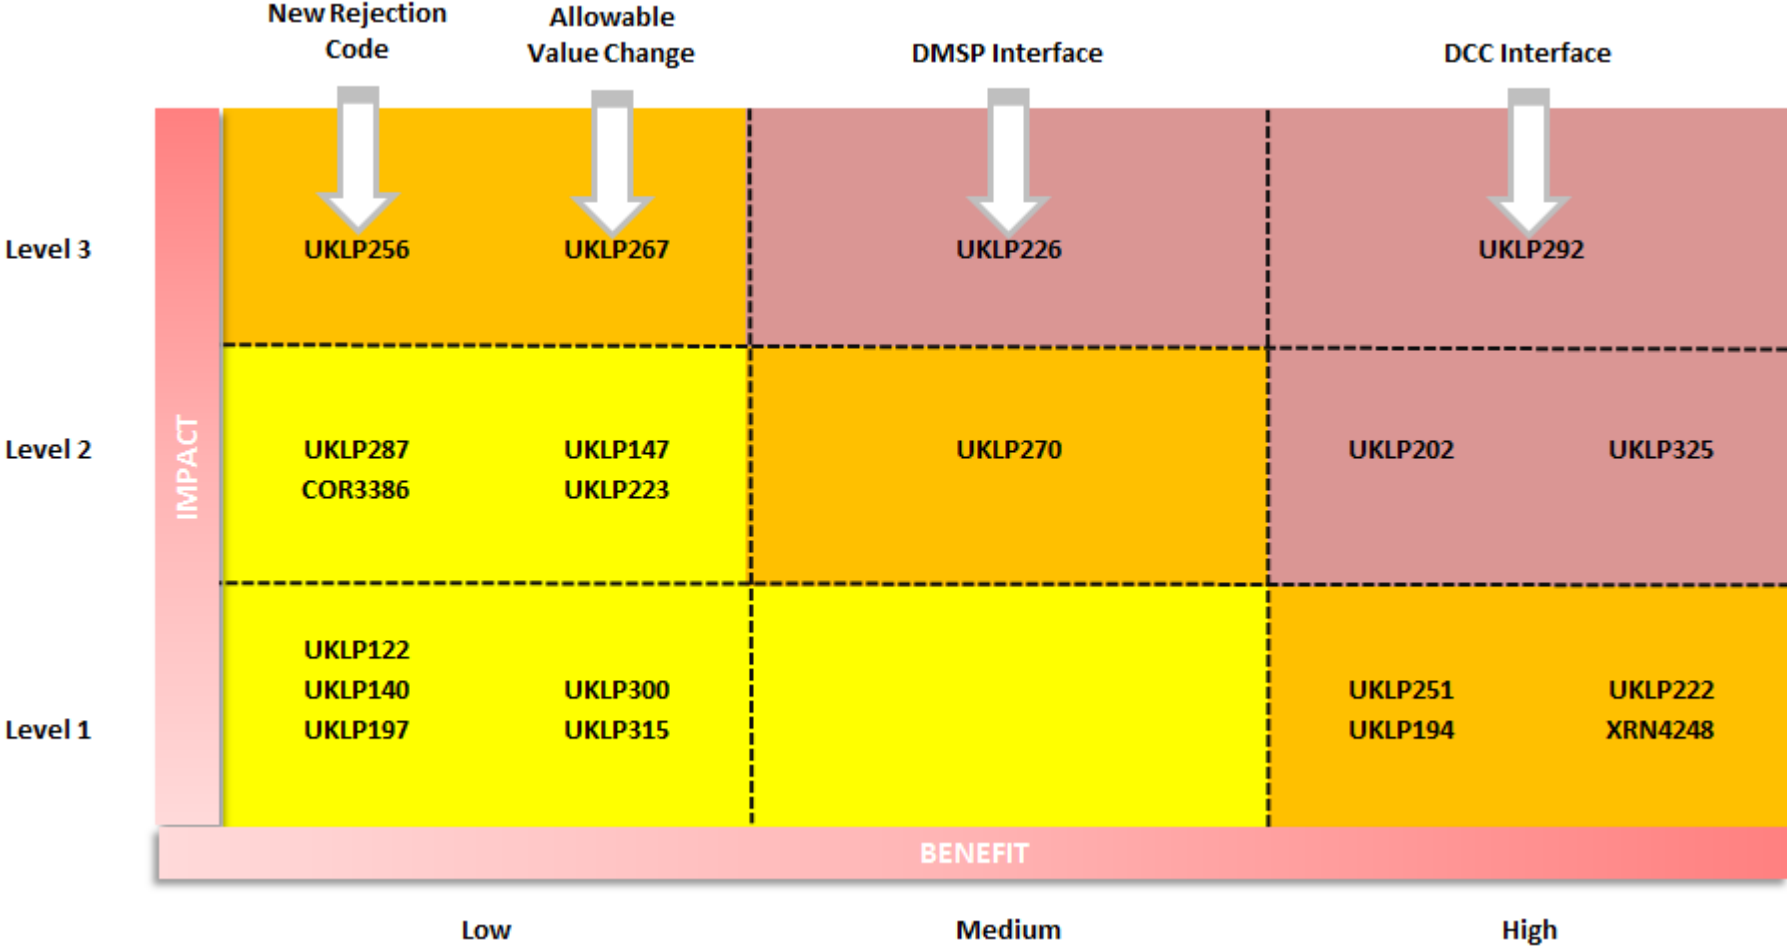

Proposed Release 2 Scope

*Low impact to Market Participants

For more information on individual change impact, please refer CDB in [Appendix B](#)

Proposed Release 2 Scope

Release 2 Process Linkage

High Benefit Changes not in Release 2 Scope

- ❑ 5 out of 12 of the high benefit changes CRs are excluded from the proposed R2 scope as they do not have a change sponsor
- ❑ 5 out of 12 CRs are subject to Industry Governance process on RAASP
- ❑ 2 out of 12 CRs are substantially complex
- ❑ Remaining CDB includes CRs proposed for R2, Low/Medium priority CRs not proposed for R2 & Changes scoped in R1.1, PIS and BAU releases.

❖ UKLP071, UKLP112, UKLP192, UKLP262 & UKLP273:

- ❖ As confirmed by DSC ChMC, these Changes require a Sponsor to progress.
- ❖ These changes have significant external impacts

❖ UKLP152, UKLP154, UKLP155, UKLP189, UKLP319:

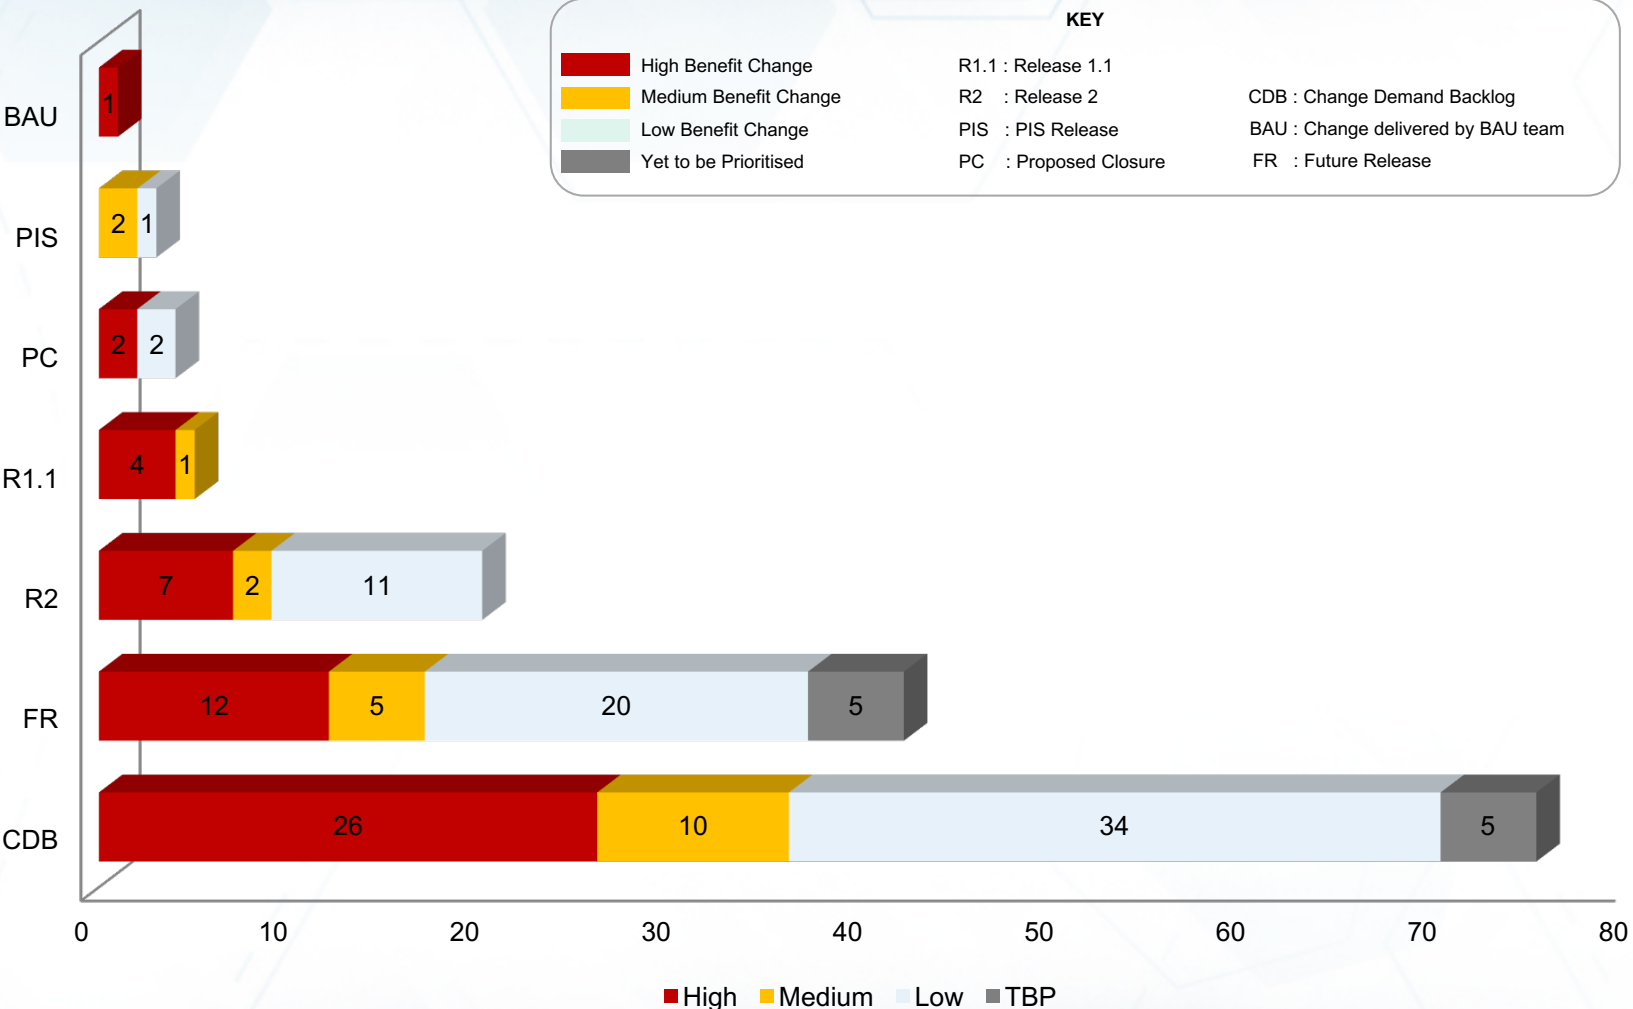

- ❖ These 5 changes relate to RAASP requirements, will be considered post Industry Governance Process on RAASP (via *Workgroup 0624R - Review of arrangements for Retrospective Adjustment of Meter Information, Meter Point/Supply Point and Address Data.*)

❖ UKLP109, UKLP281:

- ❖ These changes are substantially complex and will require extensive changes to the UKLink system.

For more information on individual change impact, please refer CDB in [Appendix B](#)

Appendix

Appendix A - Proposed Release 2 Scope

CR Ref.	Change Title	Benefit	Impact	Common Code
UKLP194	Billing History by all NTS capacity / commodity related charges (from Nexus implementation onwards)	High	1	No
UKLP222	Theft Risk Assessment Service Tip-off Hotline Data Provision – Enduring Solution	High	1	No
UKLP251	Reports required under UNC TPD V16.1 in Nexus (reports required by MOD 520A)	High	1	No
XRN4248	Quarterly smart Metering reporting for HSE and DNs	High	1	No
UKLP122	PAF Indicator field inclusion on VAD and ACR files	Low	1	Yes
UKLP140	.DUP & .DUS file type registration in AMT	Low	1	No
UKLP197	Addition of New fields from CMS being available in BW/IP reporting environment	Low	1	No
UKLP315	Meter Point Details Report & Sector Breakdown Report	Low	1	No
UKLP300	Unique Sites – Adding profiles	Low	1	Yes
UKLP202	Reads failing market breaker tolerance to be accepted for correct date following AQ Correction	High	2	Yes

Appendix A - Proposed Release 2 Scope

CR Ref.	Change Title	Benefit	Impact	Common Code
UKLP325	Annual shrinkage submission (.ORD) received from Networks is not getting apportioned correctly when the adjustment period is spanning across Nexus Go live date (01-June-2017)	High	2	Yes
UKLP292	Changes to the upper parameter of the XDO partial refresh file	High	3	No
COR3386	New DN role for CMS	Low	2	Yes
UKLP147	DDS/DDU file amendment	Low	2	Yes
UKLP223	Allow for a capacity revision on a Seasonally Large Supply Point	Low	2	Yes
UKLP226	Provide the DMSP with the AQ in the O13 record on the GCC file	Medium	3	Yes
UKLP256	NDM Twin Stream Read Validation	Low	3	Yes
UKLP267	Remove 'n' as an allowable value from the .SFN file in 'Fault corrected' field and remove as allowable value from AMT & SAP ISU.	Low	3	Yes
UKLP270	Amend referral rules for class 2 smaller LSP's	Medium	2	Yes
UKLP287	Back billing for domestic (SSP) sites needs to be reflect the correct adjustment start date	Low	2	Yes

Appendix B - Change Demand Backlog

The current version (v7) of Change Demand Backlog is attached for reference: The proposed release scope for all changes are updated in this version.
