

**Meter Asset Manager
Request for a community view
within Data Enquiry Service (DES)**

Summary

- Meter Asset Managers (MAMs) have discussed requirements to gain access to a MAM community view within Data Enquiry Service (DES).
- It has been confirmed that changes within both the UNC and SPAA would be required to create permissions within the relevant Codes before this Service could be provided by the CDSP.
- MAMs have been asked to provide the following:
 - The business case for the provision of this data view
 - As a community, confirmation that MAMs want this information to be available and displayed
 - Considerations around the data items requested for inclusion within this view

Preliminary Data Items requested

- MAMs have initially indicated that the following data items would require inclusion within a MAM community view:
 - MPRN
 - Address
 - Postcode
 - MSN
 - Supplier ID
 - MAM
 - Meter Type
 - Meter Capacity
 - Network/iGT Id
 - Interruption contract in place
 - Meter Mechanism (where Smart)
 - First SMETS installation date
 - Supplier ID that installed the Smart Meter

Consideration by Distribution Workgroup

- Xoserve welcome the Distribution Workgroup attendees views on:
 - The assessment that this would require a UNC Modification to enable the relevant permissions within Code to be created
 - The information parties would wish to see in support of a Modification
 - Views on the preliminary data items requested in a community view by MAMs
