

## **Industry update from Ofgem – up to date as of 3 January 2018**

### ***UNC642: ‘Changes to settlement regime to address Unidentified Gas issues’ and UNC643: ‘Changes to settlement regime to address Unidentified Gas issues including retrospective correction’ – decision on urgency***

On 22 December 2017 we published a letter agreeing with requests that the modification proposals UNC642 and UNC 643 should both be given urgent status and follow urgent modification procedures.

### ***RIO gas transmission annual report 2016-17***

On 19 December 2017 we published an annual report summarising the performance of the National Grid Gas Transmission (NGGT) against its price control obligations and incentives during the fourth year of RIO-T1 which runs from 2013 to 2021. The report also provides information on NGGT’s updated forecasts for the remaining years of RIIP-T1.

### ***Approval of BBL’s modified access rules and charging methodology***

On 27 December 2017 we approved changes proposed by BBL to its access rules and charging methodology respectively under Standard Licence Conditions 10 and 11A of the gas interconnector licence. The changes were made to implement BBL’s capacity conversion service in order to facilitate compliance with CAM NC. The changes took effect on 1 January 2018.
