Gas Charging Review UNC0621

UNC Panel 15 February 2018 UNC0621 Timelines

- Drivers for timescales and the updates presented:
 - Compliance with EU Tariffs Code (May 2019)
 - Decision by mid march 2019 at latest required in order to calculate 2019 charges
 - UNC processes required to be completed before Impact Assessment
- As a result of all the required steps and working back from compliance date it is proposed that the Workgroup report requested no later than May 2018.

Gas Charging Review: Possible Revised Plan Timescales

For awareness

UNC0621 is the modification that is delivering charging changes (Gas Charging Review) that includes compliance with the EU Tariffs Code.

- If the UNC dates (e.g. Workgroup report getting to May Panel) were put at risk then it may require discussion at Panel for potential ways to address within the relevant processes.
- Through workgroups alternative modifications are being requested by 2 March 18 for March Panel.
