

Performance Assurance Committee Meeting

Summary – 11 December 2018

KEY MESSAGES – 11 DECEMBER 2018

- The PAFA provided a progress update to PAC on Shippers issued with Data Cleanliness letters for PARR Report 2A.1 – “Use of Estimated & Checks Reads for PC1 and PC2” and 2A.9 – “Use of Standard Correction Factor for sites that have an AQ greater than 732,000 kWh”.
 - ◆ Performance improvements are already being seen
 - ◆ PAFA will provide a full report to PAC at the March PAC meeting

- PAFA reported increased industry engagement and a rise in Huddle usage following the issuing of warning letters to all Shippers in Product Class 3 for PARR report 2A.5- “Read Performance”.
 - ◆ Industry have also provided useful insight to general industry issues. PAFA will be taking this to PAC in Q1 2019

- The PAC agreed for PAFA to send out Data Cleanliness Observation letters to poor performers in both 2A.3 “No Meter Recorded and data flows received” and 2A.8 “AQ Correction by Reason Code”.

- PAC have agreed to begin to address the issue of historic consumption adjustments, with the co-operation of the CDSP.

- PAC have successfully agreed to adopt a new management and escalation process whilst Modification 674 is being developed.
