

## MODIFICATION PROPOSAL 0678 AND ALTERNATIVES

### EXPLANATORY NOTE FOR LEGAL TEXT

This note explains how the legal text for Modification Proposal 0678 and each Alternative is presented.

1. The formal legal text for Modification Proposal 0678 comprises:
  - (a) the short main legal text document which sets out the amendments to UNC (in TPD Sections B, E, G and Y; EID Section B and the Transition Document Part IIC) and refers to Annexes A, B and C;
  - (b) Annex A which shows the amendments to TPD Section marked as changes against the existing version of TPD Section B;
  - (c) Annex B which sets out the new NTS transportation charging methodology to be incorporated as Part A-I in TPD Section Y replacing the existing contents of this Part;
  - (d) Annex C which sets out a new paragraph 25 to be incorporated in Part IIC of the Transition Document.
2. The formal legal text for each Alternative comprises the same documents as are set out in paragraph 1, as applicable for that Alternative, and shown (where relevant) as changes against the existing version of the UNC.
3. In addition, two other sets of documents are available, to explain the differences between Modification Proposal 0678 and the Alternatives. These do not form part of the formal legal text – they are provided for explanation only.
4. The first set of documents are the working documents used in Workgroup 0678. They comprise:
  - (a) a table setting out, for each Alternative, and for different topics, the specific differences between the legal text for the Alternative and the 0678 legal text, and in some cases referring to an attachment. The table is in columns:
    - (i) the first two columns identify the relevant topic;
    - (ii) the third, fourth and fifth columns set out legal text changes (by comparison with 0678) in TPD Section Y, in TPD Section B (and minor changes in Section G), and in the Transition Document;
  - (b) for larger blocks of text (for specific topics) there are separate attachments. Many of the attachments cover a topic which features in more than one Alternative. Each attachment sets out:
    - (i) what topic it covers;
    - (ii) which part of UNC it relates to;
    - (iii) which Alternatives incorporate it.

5. The second set of explanatory documents is a comparison, for each Alternative, of each document referred to in paragraph 2 against the equivalent for 0678 (in paragraph 1). Please note that the errata listed in the note dated 17.4.19 have been corrected in these documents.
