1 November 2019

Dear David,

## Notice of Indicative Gas NTS Transportation Charges effective from 1 April 2020

In accordance with National Grid's Gas Transporters Licence obligations to provide at least 150 days' notice of changes to its gas transportation charges, I enclose for your information a copy of our Indicative Notice of revised NTS transportation charges that will apply from 1 April 2020.

The notice will be published to industry via the Joint Office later today and a copy will be uploaded onto our website.

[www.nationalgridgas.com/charging/transmission-system-charges](http://www.nationalgridgas.com/charging/transmission-system-charges).

There are currently several UNC Charging modifications running which may affect the Transportation Charging methodology. Modification 0678 'Amendments to Gas Transmission Charging Regime' (including ten alternates) and Modification 0686 – 'Removal of the NTS Optional Commodity Rate with adequate notice'. There is the potential for the payable prices associated with capacity allocated and commodity charges to be impacted by such modifications.

Market participants should keep up to date and engage with how the Tariff Network Code will be reflected in the UNC via the Joint Office

<http://www.gasgovernance.co.uk/index.php/withofgem>

Please note that the charges included in this notice are currently calculated solely on the current methodology, in line with the UNC, and will continue to be so until more certainty is available on the potential changes.

Should you have any queries or wish to discuss further, please do not hesitate to contact me.

Yours sincerely
