

Schedule 2A.x – Industry Peer Comparison View

Report Title	Sites converted from PC 2/3 to PC4 by the CDSP due to low read submission levels at individual supply points
Report Reference	2A.x (reference to be determined following implementation of UNC Modification 0664)
Report Purpose	To compare Shipper performance in managing their valid meter reading submission for Class 2 and 3 supply points against the minimum submission at supply point level (not against the UNC portfolio level targets), by reporting on the number of sites which the CDSP has converted to Class 4, following failure to meet the minimum requirements at levels over the Performance Period.
Expected Interpretation of the report results	The aim is to understand whether required UNC minimum standards are being met. The report should identify performance across all market participants
Report Structure (actual report headings & description of each heading)	Monthly non-cumulative report Peer Comparison Identifier Product Class Count of supply points for which the CDSP has moved to Class 4 during the month Industry Total
Data inputs to the report	SSC Peer Comparison Identifier Product Class Count of sites converted by the CDSP Excludes Class changes initiated by the Shipper
Number rounding convention	Whole numbers
History (e.g. report builds month on month)	A Rolling 12-month view provided monthly
Rules governing treatment of data inputs (actual formula/specification to prepare the report)	Sites are counted if they became live as Class 4 on any date in the calendar month. Sites are excluded if the Shipper initiated the Class change, or if the Class change was due to a change of Shipper The report is prepared as soon as possible after the end of the calendar month
Frequency of the report	Monthly
Sort criteria (alphabetical ascending etc.)	Peer Comparison Identifier alphabetically
History/background	Requirement introduced to support UNC Modification 0664 obligations
Additional comments	
Estimated development costs	
Estimated ongoing costs	

UNC Modification 0664

Proposed additions to Performance Assurance Report Register

Supply Points converted from PC2 or PC3 to PC4 by the CDSP due to low read submission (in accordance with UNC obligations x.x.x)							
	Month x		Month x + 1		Month x + 2		Etc for 12 months
Sub-category	PC2	PC3	PC2	PC3	PC2	PC3	
Identifier A	0	0	0	0	0	0	
Identifier B	0	0	0	0	00	0	
etc							
Total	0	0	0	0	00	0	

Schedule 2B.x – Performance Assurance Committee View

Report Title	Sites converted from PC 2/3 to PC4 by the CDSP due to low read submission levels at individual supply points
Report Reference	2B.x (reference to be determined following implementation of UNC Modification 0664)
Report Purpose	To compare Shipper performance in managing their valid meter reading submission for Class 2 and 3 supply points against the minimum submission at supply point level (not against the UNC portfolio level targets), by reporting on the number of sites which the CDSP has converted to Class 4, following failure to meet the minimum requirements at levels requirement levels over the Performance Period, as a count of Supply Points, as a percentage of the Shipper’s Supply Points in that Class and as an aggregate Rolling AQ.
Expected Interpretation of the report results	The aim is to understand whether required UNC minimum standards are being met. The report should identify performance across all market participants
Report Structure (actual report headings & description of each heading)	Monthly non-cumulative report Shipper Short Code Product Class Count of supply points for which the CDSP has moved to Class 4 during the month Percentage of the Shipper’s Supply Points in that Class that have been moved each month (as a percentage of their position at the start of the performance month) Aggregate Rolling AQ of the Shipper’s Supply Points in that Class that have been moved each month Industry Totals
Data inputs to the report	SSC Product Class Count of sites converted by the CDSP Rolling AQ of the Shipper’s Supply Points in that Class that have been moved Total count of the Shipper’s Supply Points in that Class at the start of the month Excludes Class changes initiated by the Shipper
Number rounding convention	Whole numbers Percentage figures to 1 decimal place
History (e.g. report builds month on month)	A Rolling 12-month view provided monthly
Rules governing treatment of data inputs (actual formula/specification to prepare the report)	Sites are counted if they became live as Class 4 on any data in the calendar month. Sites are excluded if the Shipper initiated the Class change, or if the Class change was due to a change of Shipper The report is prepared as soon as possible after the end of the calendar month
Frequency of the report	Monthly
Sort criteria (alphabetical ascending etc.)	Shipper shortcode alphabetically

Schedule 2A.y – Industry Peer Comparison View

Report Title	Class 2 and 3 Individual Read Performance against the Minimum Percentage Requirement
Report Reference	2A.y (reference to be determined following implementation of UNC Modification 0664)
Report Purpose	To compare Shipper performance in managing their valid meter reading submission for Class 2 and 3 supply points against the Minimum Percentage Requirement at supply point level (not against the UNC portfolio level targets), by reporting on the proportion of the portfolio achieving the applicable Minimum Percentage Requirement, plus the count-. (Note that the Minimum Percentage Requirement will be reviewed by PAC each year and therefore may change from time to time).
Expected Interpretation of the report results	The aim is to understand whether required UNC minimum standards are being met. The report should identify performance across all market participants.
Report Structure (actual report headings & description of each heading)	Monthly non-cumulative report Peer Comparison Identifier Product Class Percentage of the Shipper's portfolio (by count) which met the Minimum Percentage Requirement each month of the report period Industry Performance Percentage
Data inputs to the report	SSC Peer Comparison Identifier Product Class Individual meter point read performance (percentage of days for which reads were accepted for the month) Minimum Percentage Requirement
Number rounding convention	To one decimal place
History (e.g. report builds month on month)	A Rolling 12-month view provided monthly
Rules governing treatment of data inputs (actual formula/specification to prepare the report)	Sites are excluded if there was a Shipper transfer or Class change (whether initiated by the Shipper or the CDSP) in the month. The report is prepared at least 10 days after the end of the calendar month, and is therefore reported 2 months in arrears.
Frequency of the report	Monthly
Sort criteria (alphabetical ascending etc.)	Peer Comparison Identifier alphabetically
History/background	Requirement introduced to support UNC Modification 0664 obligations
Additional comments	
Estimated development costs	
Estimated ongoing costs	

Percentage of individual Supply Points where the Minimum Percentage Requirement of [x%] has been achieved by month (by count)
