Your Reference: UNC Modification Proposal 0701

UNC Modification Proposal 0701 - Aligning Capacity booking under the UNC and arrangements set out in relevant NExAs

Dear Bob,

Thank you for your invitation seeking representations with respect to the above Modification Proposal which Cadent would like to support.

### **Do you support or oppose implementation?**

Support

### **Relevant Objective:**

- a) Positive
- c) Positive
- f) Positive

### **Reason for support/opposition:**

The modification, if implemented, would ensure that the Supply Point Capacity (SOQ) held on central systems would never exceed the SOQ detailed in the relevant NExA. It will also ensure that any requests for additional capacity will only take effect from the specified dates within the NExA. We therefore agree that this would further Relevant Objective f).

We also agree with the proposer the modification will further Relevant Objectives a) and c) by linking relevant NExAs to requests for capacity increases.

## **Implementation**

Implementation would need to be agreed between DSC parties given the system changes necessary but we would expect a minimum of 6 months would be required.

## **Impacts and Costs**

None identified.

## **Legal Text**

We are satisfied that the legal text meets the intent of the modification.

## **Are there any errors or omissions in this Modification Report that you think should be taken into account?**

We have not identified any errors or omissions.

## **Please provide below any additional analysis or information to support your representation**

Nothing further to add.

We trust that this information will assist in the compilation of the Final Modification Report. Please contact me on 07884 113385 ([andy.clasper@cadentgas.com](mailto:andy.clasper@cadentgas.com)) should you require any further information.

Yours sincerely,

Andy Clasper
