<b>Representative:</b>	Daniel Hisgett
<b>Organisation:</b>	National Grid NTS
<b>Date of Representation:</b>	10/05/2021
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	a) Positive

#### **Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

As the proposer, National Grid NTS supports implementation of this Modification proposal. The modification proposes a simple change in the UNC with no negative impacts on any users but a positive impact for those off-taking parties who wish to use the new, optional functionality this change adds to the Offtake Profile Notice submission process. This provides off-taking parties with a better service for no additional cost as there are no system changes required and could bring small savings to the process for some parties who would no longer be required to convert real time data in to an alternative unit before submission.

#### **Implementation: What lead-time do you wish to see prior to implementation and why?**

As self-governance procedures are proposed, implementation could be sixteen business days after a Modification Panel decision to implement, subject to no Appeal being raised. Once the UNC change has been implemented there are no further changes required to codes or systems.

#### **Impacts and Costs: What analysis, development and ongoing costs would you face?**

None. Systems are already capable of supporting the proposed changes so there are no costs associated with the change but may bring cost savings through improvements in efficacy of the process.

#### **Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?**

Yes. The solution is satisfied.

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

None.

**Please provide below any additional analysis or information to support your representation**

None required.
