

UNC MODIFICATION 0779A – LEGAL TEXT AND COMMENTARY

A. COMMENTARY

The Uniform Network Code currently allows for assignment of Capacity and liability between Users at an Exit Point both in full and in part. This Modification proposes to enhance the current Assignment arrangement by providing the ability to assign Capacity at Entry Points both in full and in part. The text provides for the assignment for the remaining duration of the capacity booking and an alternative of an assignment for any period from a Day to the remainder of the capacity booking.
