Support or oppose implementation?	Support
Relevant Objective:	g) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

As proposer of this Modification National Grid NTS supports its implementation. National Grid believes that this change aligns more closely with CAM NCⁱ and therefore improves compliance, furthering Relevant Objective (g). It also enables full implementation of UNC 0755S, a modification which has already been approved via the Self Governance process. Without this modification, UNC 0755S could not be applied to Interconnection Points, one of the key elements of the proposed and approved solution. The adjustment to the European Interconnector Document allows for capacity to be assigned at interconnectors. Both National Grid as the proposer and the Workgroup believes the 'for the avoidance of doubt' line, currently in section B 6.3.3 c, is surplus to requirements as the existing text is already clear.

As the modification has no impact beyond enabling the full implementation of UNC 0755S, a Self-Governance modification which has already been approved, National Grid believe this modification should also be subject to the Self Governance process due to their being no material impacts on aspects described in the Self Governance criteria.

Implementation: *What lead-time do you wish to see prior to implementation and why?*
