

UNC 0816:

Mod Title: Update to AQ Correction Processes

Proposer: E.ON Next

Panel Date: 18th August 2022

Why change?

- This Modification proposes to add two further 'eligible clauses' to the Annual Quantity (AQ) amendment process within TPD G2.3.21 and to prevent AQ amendments being processed where there is no change in value to the AQ.
- This Modification has followed on from [0783R – Review of AQ Correction Processes](#) which looked at summary data of how current eligible causes are used, and whether the current eligible causes for utilising an AQ amendment are fit for purpose.
- As a result, Modification 0816 was raised to cover what was pulled out of these discussions as beneficial changes to the AQ amendment process.

Options

- There is only one option:

To make the amendment to TPD G2.3.20 in order to add two further 'eligible clauses' to the Annual Quantity (AQ) amendment process within TPD G2.3.21 and to prevent AQ amendments being processed where there is no change in value to the AQ.

Solution

- Amendment of clause TPD G 2.3.21 to add in the two further eligible causes:
 - [Erroneous AQ based on read history]
 - [Change in operation/consumption]
 - Prevent AQ amendments being processed where there is no change in value to the AQ.

Recommended Steps

- the Proposer recommends for this Modification:
- subject to Self-Governance
- assessed by a Workgroup for [3 months]
