#### Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

SGN supports this modification as it will provide a means for Shipper Agreed Reads to be updated by the Central Data Services Provider if the Shipper fails to update the read. If this modification is implemented it will help to improve the information held in the central systems and should therefore increase the accuracy of the settlements process thus furthering relevant objectives (d) and (f).

#### Self-Governance Statement: *Please provide your views on the self-governance statement.*

We agree with the self-governance statement as this is a non-material change.

#### Implementation: *What lead-time do you wish to see prior to implementation and why?*

We are mindful that this change will need to align to the necessary changes to the central systems being made which isn't likely to take place until November 2023, therefore we would expect that the implementation would align to this piece of work being completed.

#### Impacts and Costs: *What analysis, development and ongoing costs would you face?*

No costs or impacts to SGN are envisaged.

**Legal Text:** *Are you satisfied that the legal text will deliver the intent of the Solution?*

We are satisfied with the legal text.

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

None identified.

**Please provide below any additional analysis or information to support your representation**

We don't have any further comments.
