**MODIFICATION 0808**  
**REVERSE COMPRESSION**

[Final legal text]

**TRANSPORTATION PRINCIPAL DOCUMENT**

**SECTION A – SYSTEM CLASSIFICATION**

Add new paragraph 2.4 to read as follows:

**2.4 IGT LDZ System Entry Point**

An "IGT" LDZ System Entry Point is an LDZ System Entry Point where gas can flow from an IGT System (as defined in IGTAD Section A2.1.1) into an LDZ (in which case the IGT System is a Connected Delivery System).

Formatted: Font: Bold

**INDEPENDENT GAS TRANSPORTER ARRANGEMENTS DOCUMENT**

**SECTION A – SCOPE AND CLASSIFICATION**

Amend paragraph 1.1.1 to read as follows:

Formatted: Font: Italic

1.1.1 The Independent Gas Transporter Arrangements Document sets out:

Formatted: Font: 10 pt

- (a) ...;
- (b) ...in relation to CSEP System Exit Points and IGT LDZ System Entry Points.

**SECTION B – IGTS SYSTEMS – CONNECTION AND OPERATIONAL ARRANGEMENTS**

Amend paragraph 1.1.1 to read as follows:

1.1.1 This Section B sets out:

- (a) ...;
- (b) ...; and
- (c) provisions (at paragraph 3.5) relating to reverse compression.

Deleted: and

Formatted: Font: (Default) Arial

Add new paragraph 3.5 to read as follows:

**3.5 Reverse Compression**

3.5.1 For the purposes of this paragraph 3.5 "reverse compression" occurs where a directly-connected IGT System includes reverse compression facilities the operation of which by the Independent Gas Transporter causes gas which has flowed out of the DNO System and into

Formatted: Font: Not Bold

Formatted: Font: Bold

the IGT System to flow back from the IGT System to the DNO System at an IGT LDZ System Entry Point,

Formatted: Font: Not Bold

3.5.2 An Independent Gas Transporter and a DN Operator will not permit gas to flow into a DNO System at an IGT LDZ System Entry Point as a result of reverse compression unless:

(a) there is in force an LDZ System Network Entry Agreement;

(b) such agreement contains, on terms satisfactory to the DN Operator (acting reasonably), inter alia:

Formatted: Not Highlight

(i) provisions relating to the monitoring by the DN Operator of the characteristics of gas subject to reverse compression (and the basis on which the Independent Gas Transporter will compensate the DN Operator for all reasonable costs and expenses incurred by the DN Operator for such purpose); and

Formatted: Not Highlight

(ii) provisions regarding the basis on which the Independent Gas Transporter will comply with the DN Operator's instructions regarding operation of the reverse compression facilities following notification by the DN Operator of maintenance to the DNO System affecting such operation.

3.5.3 An Independent Gas Transporter will not permit gas which is the subject of reverse compression to be delivered to premises connected to the IGT System.

Formatted: Level 3 Number, Indent: Left: 0 cm, Hanging: 1.27 cm, No bullets or numbering, Tab stops: 0 cm, Left + 0.16 cm, Left

3.5.4 In respect of any such LDZ System Network Entry Agreement TPD Section I2.1, 2.2, 2.3.1(c)(ii), 2.5, 3.11.2, 3.11.3(b), 3.11.4 and 3.11.6 to 3.11.9 (inclusive) shall not apply.

Formatted: Outline numbered + Level: 3 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 0 cm + Indent at: 1.27 cm

3.5.5 Where reverse compression occurs and gas flows back from an IGT System to a DNO System:

(a) the gas is treated as taken out of the IGT System by IGTS Users (pursuant to and as provided in the IGT Code) and put into the DNO System by Shippers Users;

Formatted: Level 4 Number, Indent: Left: 1.27 cm, Outline numbered + Level: 4 + Numbering Style: a, b, c, ... + Start at: 1 + Alignment: Left + Aligned at: 1.59 cm + Indent at: 2.86 cm

(b) title and risk in such gas shall pass (as gas is taken out of the IGT System) from the Independent Gas Transporter to Shipper Users, and simultaneously (as the gas is put back into the DNO System) from Shipper Users to the DN Operator (in accordance with paragraph 3.5.7);

Formatted: Level 4 Number, Indent: Left: 2.54 cm

(c) subject to paragraph 3.5.2, no requirements apply as between the DNO Operator and Shipper Users as regards the making of nominations in respect of the composition, measurement or the pressure of such gas; and

Formatted: Not Highlight

(d) notwithstanding the fact the Independent Gas Transporter or DN Operator may cause or permit such gas flow, neither shall be treated as taking gas out of the IGT System or putting it into the DNO System, and nothing in the Code shall be construed as having any contrary effect.

3.5.6 So far as it may be necessary for any purpose to determine the same, in relation to an IGT LDZ System Delivery Point on a Day, the proportions in which Shipper Users:

(a) put gas into the DNO System; and

(b) have title and risk in such gas

shall be equal to the proportions of the sums respectively of their UDQOs in respect of the IGTS System connected to the DNO System.

3.5.7 The point at which risk and title in gas passes for the purposes of paragraph 3.5.5(b) shall be the relevant point specified in the LDZ System Network Entry Agreement.

3.5.8 Where requested by the Independent Gas Transporter the DN Operator will provide to it reasonable details of the DN Operator's planned use, operation and development of its DNO System which the Independent Gas Transporter may reasonably request for the purposes of any decision by the Independent Gas Transporter regarding the installation and operation of reverse compression facilities on its IGT System.

3.5.9 No DN Operator shall be liable pursuant to paragraph 3.5.8 to any Independent Gas Transporter in relation to any information, forecast of other information provided to the Independent Gas Transporter, and nothing contained therein will bind a DN Operator to take (or not take) any action regarding the use, operation or development of its DNO System.
