<b>Representative:</b>	Ruby Jones
<b>Organisation:</b>	Biogen (UK) Limited
<b>Date of Representation:</b>	8 <sup>th</sup> August 2023
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	<b>b)</b> Positive <b>d)</b> Positive
<b>Relevant Charging Methodology Objective:</b>	<b>c)</b> None

**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

There is a significant portion of the existing gas network where injection of Biomethane is constrained restricting injection, especially on Summer nights but also meaning that there is zero capacity for new injection projects. The Green Gas Support System is time limited and at this stage no future funding mechanisms have been confirmed. Given the climate crisis, now is the time to maximise renewable gas production & this modification would be a significant step in delivering projects into the market place. We would like to see this implemented as soon as possible and for DNO's to facilitate additional network capacity within a reasonable timeframe.

**Implementation: What lead-time do you wish to see prior to implementation and why?**

As soon as possible

**Impacts and Costs: What analysis, development and ongoing costs would you face?**

None – it would remove uncertainty

**Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?**

Yes

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

No

**Please provide below any additional analysis or information to support your representation**

None
