Dear Hannah,

National Grid NTS Metering Charges from 1 April 2012

Please find attached schedules showing National Grid NTS's revised metering charges to apply from 1 April 2012. National Grid NTS has submitted revised metering charges for those services that it is obliged to offer under its Gas Transporter (GT) Licence coupled with those services that are currently offered for historical/legacy purposes i.e. where a Datalogger or Converter has been fitted at an NTS Site or there is a maintenance requirement for an NTS High Pressure Meter Installation.

This notification is provided 2 months in advance of the effective date consistent with the notice period required under the Uniform Network Code.

National Grid NTS's metering charges are regulated by a price control set by Ofgem. Ofgem has set tariff caps for four key metering services: Credit Meters, Prepayments Meters, Domestic Meter Exchanges, and Daily Meter (DM) Reading. National Grid's charges for these services must not exceed the tariff caps, which are adjusted each year by inflation (RPI), as set out in the attached schedules.

The cost of maintaining High Pressure Metering Installations will rise more than inflation to reflect the high maintenance costs arising from wage and fuel inflation and the complexity of the metering installations.

The revised charges will be published on National Grid's Internet site www.nationalgrid.com/uk/gas (under the Charging and Metering Charges pages). If you have any questions about the new charges, please contact myself or Karin Elmhirst on 01926 655540.

Yours sincerely
