## Managing Gemini Change under the DSC Change Process Dave Turpin

### **DSC Change Management Procedures**

Within the Change Management Procedures contains the following provisions:

- 1.5.2 Under this Document different arrangements apply in relation to:
- (a) changes to Services and related amendments of the CDSP Service Description (and where applicable to the Specific Service Change Charge Annex of the Budget and Charging Methodology);
- (b) modifications of UK Link;
- (c) amendment of the UK Link Manual; and
- (d) amendment of Other CSDP Service Documents.

### **Gemini Changes**

- Gemini Services are provided under the services described within the Service Description table and therefore changes to these fall under 1.5.2 (a)
- The governance surrounding decisions by the Change Committee (where a constraint does not arise in the delivery of Gemini Changes with other Changes) will be of restricted class with National Grid being the only voting party
- Where there is a conflict in the delivery of change, section 4.4 describes where a change may have an adverse impact on other customer classes. In the instance where a constraint arises in the delivery of a Gemini Change with one or more other Change, this would lead to a Change Management Committee discussion as to the priority and delivery of all impacted Changes (including the Gemini Change). The Change Management Committee then bears responsibility for agreeing a course of action to mitigate the adverse impacts identified.
