Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

Overview of proposed change			
Change Details		<p>National Grid is legally obligated to be compliant with the EU Capacity Allocation Mechanism (CAM) Network Code and the UNC. This Change Proposal proposes to modify Gemini to meet the obligations set-out in the CAM Code and the UNC in relation to Capacity Conversion for Interconnection Points.</p> <p>The proposal is to modify Gemini in the most efficient way possible to meet the compliance deadlines laid out in UNC Modification 616 and the CAM Code, which stipulate a go live date of January 2018.</p> <p>National Grid have completed the period of Feasibility and Analysis for all EU CAM and GB Charging change requirements f</p> <p>Defined in XRN4262 “EU/GB Charging 18/19 Gas Regulatory Change Feasibility and Analysis Study”. This change proposal is being raised in relation to the Capacity Conversion analysis results and seeks to modify Gemini in-line with Solution 7 outlined in the Capacity Conversion ‘Change, Business Requirements and Solution’ (CBRS) document.</p> <p>The solution is known as: <i>Buyback with Actual Price and System solution for Product Update</i></p> <p>In order to meet the Capacity Conversion obligations deadline National Grid plans to utilise the existing Buy-Back functionality in Gemini. However to ensure Product level data (Sold/Unsold values) remains correct within the system post a conversion request, a change is required in Gemini to give National Grid Business users the functionality to manually update this data. This update will form part of a wider manual process to be completed by National Grid in for Capacity Conversion requests.</p> <p>This change needs to be delivered at the earliest opportunity to mitigate any potential requirement for system data-fixes and extensive manual workarounds.</p> <p>Change Overview:</p> <p>A Capacity Conversion HLE was created as an output from the work undertaken as part of XRN4262. This HLE provides an indicative timeline</p>	

	<p>and cost for this change. National Grid would expect the change to be delivered in-line with these parameters.</p> <p>The delivery plan is expected to be for a period of approximately 14 weeks to allow for delivery by the end of February 2018. To mitigate the risk of Conversion requests being submitted prior to the system implementation NG will ensure a robust manual process is in place and request for Xserve to support should Gemini data need 'fixing' during the period Jan-Feb 2018.</p>
Reason(s) for proposed service change	This particular Change Proposal relates to compliance with the Capacity Conversion obligations, in relation to the amendments to the primary legislation in the Capacity Allocation Mechanism Network Code and UNC modification 616.
Status of related UNC Mod	Sent to Panel
Full title of related UNC Mod	UNC Mod 0616S: Capacity Conversion Mechanism for Interconnection Points
Benefits of change	By undertaking this change National Grid could meet the compliance obligation deadline in relation to Capacity Conversion in an efficient and cost effective manner. National Grid propose to utilise existing Gemini functionality wherever possible in conjunction with the creation of an off-line operational process, however the mitigation of the risk of key data becoming out of sync/not compliant is the key benefit of this change.
Required Change Implementation Date	Q1 2018

Section 4: ROM Analysis

This ROM is Xoserve's response to the above Evaluation Service Request. The response is intended to support customer involvement in the development of industry changes. Should the request obtain approval for continuance then a Change Proposal must be raised for any further analysis / development.

Disclaimer:

This ROM Analysis has been prepared in good faith by Xoserve Limited but by its very nature is only able to contain indicative information and estimates (including without limitation those of time, resource and cost) based on the circumstances known to Xoserve at the time of its preparation. Xoserve accordingly makes no representations of accuracy or completeness and any representations as may be implied are expressly excluded (except always for fraudulent misrepresentation).

Where Xoserve becomes aware of any inaccuracies or omissions in, or updates required to, this Report it shall notify the Network Operators' Representative as soon as reasonably practicable but Xoserve shall have no liability in respect of any such inaccuracy or omission and any such liability as may be implied by law or otherwise is expressly excluded.

This Report does not, and is not intended to; create any contractual or other legal obligation on Xoserve.

Appendix One: Glossary

Term	Definition
Adverse Impact	<p>A Service Change has or would have an Adverse Impact on Customers of a particular Customer Class if:</p> <p>(a) Implementing the Service Change would involve a modification of UK Link which would conflict with the provision of existing Services for which such Customer Class is a Relevant Customer Class;</p> <p>(b) the Service Change would involve the CDSP disclosing Confidential Information relating to such Customers to Customers of another Customer Class or to Third Parties;</p> <p>(c) Implementing the Service Change would conflict to a material extent with the Implementation of another Service Change (for which such Customer Class is a Relevant Customer Class) with an earlier Proposal Date and which remains Current, unless the Service Change is a Priority Service Change which (under the Priority Principles) takes priority over the other Proposed Service Change; or</p> <p>(d) Implementing the Service Change would have an Adverse Interface Impact for such Customers.</p>
General Service	A service provided under the DSC to Customers or Customers of a Customer Class on a uniform basis.
Non-Priority Service Change	A Service Change which is not a Priority Service Change
Priority Service Change	<p>A Modification Service Change;</p> <p>or</p> <p>A Service Change in respect of a Service which allows or facilitates compliance by a Customer or Customers with Law or with any document designated for the purposes of Section 173 of the Energy Act 2004 (including any such Law or document or change thereto which has been announced but not yet made).</p>
Relevant Customer class	A Customer Class is a Relevant Customer Class in relation to a Service or a Service Change where Service Charges made or to be made in respect of such Service, or the Service subject to such Service Change, are or will be payable by Customers of that Customer Class
Restricted Class Change	Where, in relation to a Service Change, not all Customer Classes are Relevant Customer Classes, the Service Change is a Restricted Class Change ;
Service Change	<p>A change to a Service provided under the DSC (not being an Additional Service), including:</p> <p>(i) the addition of a new Service or removal of an existing Service; and</p> <p>(ii) in the case of an existing Service, a change in any feature of the Service specified in the CDSP Service Description, and any related change to the CDSP Service Description</p>
Specific Service	A service (other than Additional Services) available under the DSC to all Customer or Customers of a Customer Class but provided to a particular Customer only upon the order of the Customer.
